NOTICE TO READER

This report has been prepared and the work referred to in this report have been undertaken by SNC-Lavalin Inc., Environment & Geoscience (E&G) for the exclusive use of Joandarc Realty (the Client), who has been party to the development of the scope of work and understands its limitations. The methodology, findings, conclusions and recommendations in this report are based solely upon the scope of work and subject to the time and budgetary considerations described in the proposal and/or contract pursuant to which this report was issued. Any use, reliance on, or decision made by a third party based on this report is the sole responsibility of such third party. E&G accepts no liability or responsibility for any damages that may be suffered or incurred by any third party as a result of the use of, reliance on, or any decision made based on this report.

The findings, conclusions and recommendations in this report (i) have been developed in a manner consistent with the level of skill normally exercised by professionals currently practicing under similar conditions in the area, and (ii) reflect E&G's best judgment based on information available at the time of preparation of this report. No other warranties, either expressed or implied, are made with respect to the professional services provided to Client or the findings, conclusions and recommendations contained in this report. The findings and conclusions contained in this report are valid only as of the date of this report and may be based, in part, upon information provided by others.

If any of the information is inaccurate, new information is discovered, site conditions change or applicable standards are amended, modifications to this report may be necessary. The results of this assessment should in no way be construed as a warranty that the subject site is free from any and all contamination.

Any soil and rock descriptions in this report and associated logs have been made with the intent of providing general information on the subsurface conditions of the site. This information should not be used as geotechnical data for any purpose unless specifically addressed in the text of this report. Groundwater conditions described in this report refer only to those observed at the location and time of observation noted in the report.

This report must be read as a whole, as sections taken out of context may be misleading. If discrepancies occur between the preliminary (draft) and final version of this report, it is the final version that takes precedence. Nothing in this report is intended to constitute or provide a legal opinion.

The contents of this report are confidential and proprietary. Other than by the Client, copying or distribution of this report or use of or reliance on the information contained herein, in whole or in part, is not permitted without the express written permission of the Client and E&G.

EXECUTIVE SUMMARY

SNC-Lavalin was engaged by Darcsol Pty Ltd (Darcsol) to undertake a Phase 1 Environmental Site Assessment (Phase 1 ESA) for 14 Tennyson Road, Gladesville, New South Wales (NSW).

The subject site comprises Lot 1 of Deposited Plan (DP) 549570 and has a surveyed area of 9,321 m^2 (Grimshaw 2017). A planning proposal was prepared by Mecone Pty Ltd (Mecone) that seeks to rezone the subject site together with Lot 2 of DP 549570 from IN2 Light Industrial to B4 Mixed Use and increase the floor space ratio and building height controls. This planning proposal is currently at Gateway Determination with the Department of Planning and Environment.

Under State Environmental Planning Policy No 55 (SEPP 55), Council's consent to rezoning (Clause 6) requires the applicant to prepare and submit a site contamination report. As part of the Gateway Determination process, Darcsol has been requested to submit a contamination report for Lot 1 and 2 of DP 549570 (Ryde Council 2017). A Phase 1 ESA report has been completed for Lot 2 of DP 549570 (EIS 2012).

This report is a Phase 1 ESA for Lot 1 of DP 549570 with the following objectives:

- To identify past or current activities that may have contaminated the subject site;
- To identify Areas of Concern (AOC) and Contaminants of Potential Concern (COPC) that maybe associated with past or current activities; and
- To provide a determination of whether the subject site is suitable for rezoning to B4 Mixed Use in accordance with Clause 6 of SEPP 55.

The scope of work comprised the following:

- Desktop review of subject site and immediately surrounding areas; and
- Prepare a Phase 1 ESA report in accordance with the content requirements of the CLM Act and its associated guidelines, with note to the Guidelines for Consultants Reporting on Contaminated Sites (NSW OEH 2011).

The subject site, Lot 2 of DP 549570 and Lot 2 of DP 539330 were occupied by buildings associated with a brickworks operation from the 1920s until the late 1940s. The void within Lot 2 of DP 549570 was most likely a clay pit and or sandstone quarry that had been developed prior to 1930 and may have been associated with the earlier part of the brickworks operation. From the 1950s until the late 1960s the subject site, Lot 2 of DP 549570 and Lot 2 of DP 539330 were occupied buildings and hardstand associated with the manufacture of shoe manufacturing machinery and foot ware materials. From the late 1960s until 1995 Lot 2 of DP 549570 and Lot 2 of DP 539330 was occupied by various buildings associated with company that manufactured paint brushes and rollers (Rota Cota Pty Ltd) and other light commercial operations (e.g. home ware wholesale suppliers, printing shops, etc) (EIS 2012).

Since 1995 until the current day, the western end of the site has been used for design engineering, assembly and warehousing of various building, road and marine products. The eastern end of the site has been occupied by various light commercial operations and the warehousing and sales of waterproofing and sealant products.

Review of the site history, environmental setting and site inspection has identified the following AOC and COPC:

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

- Fill horizon in relation to several sources of COPC - Heavy metals, other metals such as barium and manganese, petroleum hydrocarbons, volatile and semi-volatile organic solvents (e.g. BTEX, VOCs and PAHs), pesticides (e.g. OCPs and OPPs) and asbestos.
- Operation and maintenance of an electrical substation (leased to Sydney County Council) located close to the western boundary (based upon design appearance has been present from 1960s/1970s until current day) – PCBs; and
- Current light commercial activities (storage of small volumes of cleaning solvents, adhesives and sealant chemicals upon hardstand areas) - volatile and semi-volatile organic solvents.

Current land use/s of the subject site do not represent a significant risk of harm to human health or the environment based upon the following lines of evidence:

- Storage of cleaning solvents, adhesives and sealant chemicals for current light commercial operators upon the subject site is limited to small volumes that are stored upon hardstand;
- The importation of fill of unknown origin occurred late 1940s / early 1950s and late 1960s / early 1970s and since that time has remained relatively undisturbed and covered by concrete / asphalt hardstand (i.e. the only areas that may have been disturbed in the last 40 years would be associated with the installation of sub-surface pipe work and or building footings);
- Human occupation of the subject site over the last 20 years has been limited to light commercial land use with no direct exposure to the fill horizon;
- Absence of persistent primary sources of fuels, lubricants, volatile and semi-volatile organic solvents in the fill horizon;
- Sampling and laboratory test work upon Lot 2 of DP 549570 (which has a site history very similar to the subject site) suggests the following:
    - An absence of gross contamination of petroleum hydrocarbons, volatile and semi-volatile organic solvents, pesticides or metals in either the fill horizon or the underlying bedrock. This site is located immediately adjacent to the subject site and its fill horizon is a potential receiver of mobile gross contamination from the subject site and Lot 2 of DP 539330 as it is located in a former quarry pit (i.e. is topographically depressed relative to the other sites);
    - An absence of either observed of laboratory detectable levels of asbestos.
- The electrical substation (leased to Sydney County Council) located close to the western boundary appears to be in relatively good condition and if surface soils were impacted by PCBs, impacted volumes are likely to be limited to shallow soils within the immediate footprint of the electrical substation;
- There are no beneficial groundwater uses within 500 metres of the subject site (i.e. no groundwater wells used for either agriculture or drinking water);
- There are no natural surface water bodies within 500 metres of the subject site; and
- Although a ground water investigation has not been undertaken in relation to the subject site or Lot 2 of DP 549570 and it is unknown whether a groundwater investigation has been undertaken in relation to Lot 2 of DP 539330, groundwater flow in the vicinity of the subject site is likely to be limited by the following aspects in terms of potential down gradient reception:

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

- Concrete / asphalt hardstand that covers most of the site will significantly limit infiltration to groundwater. This was supported by an observed absence of groundwater in the fill upon Lot 2 of DP 549570 (EIS 2012); and
- Water within the fill horizon is likely to be confined by the underlying bedrock unit is likely to have very low hydraulic conductivity (i.e. as it is comprised of competent sandstones and shales). This was supported by an observed absence of groundwater in the bedrock up to a depth of 10.2 m BGL upon Lot 2 of DP 549570 (EIS 2012).

Change of zoning from IN2 Light Industrial to B4 Mixed Use does not change the risk profile associated with the site, specifically risk of harm to human health or the environment based upon the following lines of evidence:

- The subject site is currently zoned IN2 Light Industrial and current land use/s have been evaluated as not representing a significant risk of harm to human health or the environment;
- The nature of the proposed concept plan will require removal of all fill in the vicinity of the basement car parking area and the lowest residential units. Additionally, surrounding areas would comprise a mixture of hardstand pavement and landscaped areas (levels established via importation of clean engineered fill and landscaping soils);
- Even if the COPC were encountered at the site, significant risk of harm to human health or the environment could be readily mitigated (i.e. delineation and removal of impacted soils and or disposal of perched groundwater to an appropriately NSW EPA licensed waste facility); and
- All newly proposed land uses and or developments must be approved by Council as part of the planning approval process under the EP&A Regulations 2000.

On that basis the subject site is suitable for rezoning to B4 Mixed Use in accordance with Clause 6 of SEPP 55.

It should be noted the following should be undertaken prior to development of the subject site:

- Detailed visual inspection and where necessary use of ground penetrating radar survey to confirm the presence / absence of underground storage tanks (USTs) and subsurface water treatment infrastructure at the subject site;
- Removal of all USTs as per relevant guidelines (DECCW 2009);
- A Phase 2 ESA that seeks to further qualify key risks associated with earthworks and management of soils and groundwater. It should be undertaken in accordance with all relevant guidelines under the CLM Act and as a minimum the sampling and analysis plan must qualify the nature and extent of soil and groundwater contamination that maybe associated with the fore mentioned AOC and COPC; and
- Results of the Phase 2 ESA can then be utilized to inform the Construction Environmental Management Plan (CEMP) for the development in a manner that complies with both SEPP 55 and the POEO Act (e.g. inform characterization of spoil for offsite disposal to a NSW EPA licensed land fill).

1 INTRODUCTION

1.1 BACKGROUND

SNC-Lavalin was engaged by Darcsol Pty Ltd (Darcsol) to undertake a Phase 1 Environmental Site Assessment (Phase 1 ESA) for 14 Tennyson Road, Gladesville, New South Wales (NSW) (refer to Figure 1 for subject site location).

The subject site comprises Lot 1 of Deposited Plan (DP) 549570 and has a surveyed area of 9,321 m^2 (Grimshaw 2017) (refer to Attachment 1 for a copy of the cadastral plan and current land title records).

The subject site currently comprises:

- A factory at the western end for design engineering, assembly and warehousing of various building, road and marine products (e.g. grates, expansion joints, covers, dock bumpers and marine fenders, safety flooring) [Latham Australia Pty Ltd]);
- Light commercial wholesales / manufacturing / ware-housing at the eastern end (curtain wholesalers and manufacturer [Venus Window Fashions Pty] and the warehousing and sales of waterproofing and sealant products [Pasco Construction Solutions Pty Ltd]);
- Hardstand parking (concrete and bitumen);
- Sewerage infrastructure in close proximity to the southern and western boundary (refer to Section 3.4 for more detail); and
- An electrical substation (leased to Sydney County Council) located close to the western boundary.

A planning proposal was prepared by Mecone Pty Ltd (Mecone) that seeks to rezone the subject site together with Lot 2 of DP 549570 from IN2 Light Industrial to B4 Mixed Use and increase the floor space ratio and building height controls. This planning proposal is currently at Gateway Determination with the Department of Planning and Environment.

Under State Environmental Planning Policy No 55 (SEPP 55), Council's consent to rezoning (Clause 6) requires the applicant to prepare and submit a site contamination report. As part of the Gateway Determination process, Darcsol has been requested to submit a contamination report for Lot 1 and 2 of DP 549570 (refer to Attachment 2). A Phase 1 ESA report has been completed for Lot 2 of DP 549570 (EIS 2012).

This report is a Phase 1 ESA for Lot 1 of DP 549570.

1.2 NATURE OF THE PROPOSED CONCEPT PLAN

The proposed concept plan will involve the following key elements (Grimshaw 2017) (refer to Figures 2 and 3):

- A basement car park cut into the underlying natural bedrock;
- Retail shops on the Ground Level and residential units on Levels 1 and 2 (northern side of western end);
- Residential units on the Ground Level and Levels 1 and 2 (southern side of western end and entire eastern end); and
- Surrounding areas that would comprise a mixture of hardstand pavement and landscaped areas (levels established via importation of clean engineered fill and landscaping soils).

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

1.3 OBJECTIVES

This Phase 1 ESA had the following objectives:

- To identify past or current activities that may have contaminated the subject site;
- To identify Areas of Concern (AOC) and Contaminants of Potential Concern (COPC) that maybe associated with past or current activities; and
- To provide a determination of whether the subject site is suitable for rezoning to B4 Mixed Use in accordance with Clause 6 of SEPP 55.

1.4 SCOPE OF WORK

The scope of work comprised the following:

- Desktop review of subject site and immediately surrounding areas as far as:
  - Land use/s, history and environmental setting; and
  - Potentially contaminating activities of the subject site and immediately surrounding areas as well as confirm the nature of topography, geology and drainage in the area;
- Preparation of a Phase 1 ESA report in accordance with the content requirements of the Contaminated Land Management (CLM) Act and its associated guidelines, with note to the Guidelines for Consultants Reporting on Contaminated Sites (NSW OEH 2011).

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

2 SURROUNDING LAND USES AND ZONING

Surrounding land uses and zoning under the Ryde Local Environment Plan (Ryde 2014) within 300 metres currently comprise (refer to Figure 4):

- To the north – light commercial activities upon Lot 2 of DP 549570 and Lot 2 of DP 539330 [Light Industrial (IN2) zoning] and further north Victoria Road a mixture of small business and warehouse premises [Mixed Use (B4) and Business Development (B5) zoning];
- To the west – residential properties [Low Density Residential (R2) zoning];
- To the south - residential properties [Low Density Residential (R2) zoning]; and
- To the east – residential properties and a narrow parkland area [Low Density Residential (R2) and Public Recreation zoning respectively].

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

3 SITE HISTORY

3.1 SUBJECT SITE HISTORY

The subject site history provided below is based upon the following:

- Historical land title review (refer to summary in Table 1 and copies of historical title and land transfers in Attachment 3); and
- Historical aerial photo review (refer to the summary paragraph below).

The subject site, Lot 2 of DP 549570 and Lot 2 of DP 539330 were occupied by buildings associated with a brickworks operation (Moorview Brick Company and Brickworks Limited) from the 1920s until the late 1940s. The void within Lot 2 of DP 549570 was most likely a clay pit and or sandstone quarry that had been developed prior to 1930 and may have been associated with the earlier part of the brickworks operation.

From the 1950s until the late 1960s the subject site, Lot 2 of DP 549570 and Lot 2 of DP 539330 was occupied buildings and hardstand associated with the manufacture of shoe manufacturing machinery and foot ware materials (The British United Shoe Machinery Company of Australia Proprietary Limited). From the late 1960s until 1995 Lot 2 of DP 549570 and Lot 2 of DP 539330 was occupied by various buildings associated with company that manufactured paint brushes and rollers (Rota Cota Pty Ltd) and other light commercial operations (e.g. home ware wholesale suppliers, printing shops, etc).

Since 1995 until the current day, the western end of the site has been occupied by design engineering, assembly and warehousing of various building, road and marine products (e.g. grates, expansion joints, covers, dock bumpers and marine fenders, safety flooring) [Truedoor Pty Ltd that later became Latham Australia Pty Ltd]) and the eastern end of the site has been occupied by various light commercial operations (i.e. typified by the current curtain wholesalers and manufacturer [Venus Window Fashions Pty] and the warehousing and sales of waterproofing and sealant products [Pasco Construction Solutions Pty Ltd]).

[1]Vol 3160 Folio 152 Torrens Title Register	John Symonds (engineer & contractor).	Prior to 1921
[1]Vol 3160 Folio 152 Torrens Title Register	Moorview Brick Company	1921 to 1937
[1]Vol 4609 Folio 119 Torrens Title Register	Brickworks Limited	1937 to 1947
[1]Vol 5968 Folio 157 Torrens Title Register and Vol 5967 Folio 156 Torrens Title Register	The British United Shoe Machinery Company of Australia Proprietary Limited.	1947 to 1967
[1]Vol 6997 Folio 139 Torrens Title Register and Transfer O462800	Rota Cota Pty Ltd.	1967 to 1995
Historical title search for Lot 1 of DP 549570.	W Latham & Co Pty Limited (several name changes over ownership period)	1995 to 2017

Notes: [1]Old Torrens Title Register reviewed at the NSW Land Title Office, 1 Prince Albert Road, Queens Square, Sydney, NSW.

Historical aerial photography information (EIS 2012) infers the following:

- In the 1920 and 1930's the subject site, Lot 2 of DP 549570 and Lot 2 of DP 539330 was occupied buildings most likely associated with the brick works;
- By the 1951 buildings previously associated with the brickworks had been demolished and new buildings and hardstand associated with the shoe machinery company occupied the subject site, Lot 2 of DP 549570 and Lot 2 of DP 539330;
- By 1970 the subject site, Lot 2 of DP 549570 and Lot 2 of DP 539330 was occupied by buildings associated with Rota Cota Pty Ltd (now occupied by Latham Australia Pty Ltd) and other light commercial operations (e.g. home ware wholesale suppliers, printing shops, etc) (EIS 2012); and
- By 1994 the eastern end of the subject site had an additional two light commercial building structures (now occupied by Venus Window Fashions and Pasco Construction Solutions).

3.2 Regulatory Body Records Search

3.2.1 NSW Environmental Protection Authority (EPA)

A search of the NSW EPA contaminated land public register of record of notices [maintained under Section 58 of the Contaminated Land Management Act 1997 (CLM Act)] was undertaken on 24 May 2017 (NSW EPA 2015) (refer to Attachment 4). These results infer the following in relation to the subject site and surrounding areas:

- No orders made under Part 3 of the CLM Act;
- No approved voluntary management proposals under the CLM Act that have not been fully carried out and where the approval of the EPA has not been revoked; and
- No actions taken by EPA under Section 35 or 36 of the Environmentally Hazardous Chemicals Act 1985.

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

A search of the NSW EPA public register of licence, applications and notices [maintained under Section 308 of the Protection of the Environment Operations Act 1997 (POEO Act)] was undertaken on 24 May 2017 (NSW EPA 2015) (refer to Attachment 5). These results infer the following in relation to the subject site and surrounding areas:

- No environmental protection licences, applications, notices, audits, pollution studies and reduction programs;
- No penalty notices issued by the EPA;
- No enforceable undertakings by the EPA; and,
- No convictions or prosecutions under the POEO Act.

A search of the NSW EPA public register of contaminated sites notified to NSW EPA under Section 60 of the CLM Act was undertaken on 24 May 2017 (NSW EPA 2017) (refer to Attachment 6). These results infer there are no contaminated land sites currently known to the NSW EPA in relation to the subject site.

The nearest contaminant site notified to the EPA as of 8 May 2017 is located at 436 - 484 Victoria Road in Gladesville (refer to Figure 5).The site is identified as Glade View Business Park, approximately 160 metres northeast from the site (part of Lot 2 of DP 539330) and is currently under assessment.

3.2.2 NSW Office of Environment and Heritage (OEH)

A search of the NSW OEH public register of State Heritage Inventory items was undertaken on 24 May 2017. The register contains items listed by the Heritage Council under the NSW Heritage Act 1977 and items listed by local councils and shires, and state government agencies (refer to Attachment 7). These results infer that there are no State Heritage Inventory items in the immediate vicinity of the subject site.

3.2.3 Section 149 (2) Planning Certificate

A Section 149(2) Planning Certificate under the Environmental Planning and Assessment Act 1979 (EP&A Act) was obtained for the subject site from the City of Ryde on 24 May 2017 (refer to Attachment 8). The following key aspects are inferred in relation to the subject site:

- Current zoning as Zone IN2 Light Industrial;
- The land does not include or comprise critical habitat under the Local Environmental Plan;
- An item of environmental heritage is not situated on the land under the Local Environmental Plan;
- The land is not affected by the operation of section 38 or 39 of the Coastal Protection Act 1979;
- The land has not been proclaimed to be a mine subsidence district within the meaning of Section 15 of the Mine Subsidence Act 1961;
- There are no Council Hazard Risk Policies that restrict development of the subject site;
- The land is not affected by any road widening or road realignment under:
    - Division 2 of Part 3 of the Roads Act 1993;
    - Any Environmental Planning Instrument; and,
    - Any resolution of Council.
- Development on the land or part of the land for the purposes of dwelling houses, dual occupancies, multi dwelling housing or residential flat buildings (not including development for the purposes of group homes or seniors living) is subject to flood related development controls;

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

- Development on the land or part of the land for any other purpose is subject to flood related development controls;
- The subject site is not part of Biodiversity Certified Land under Part 7AA of the Threatened Species Conservation Act 1995;
- The subject site is not part of a Biobanking Agreement under Part 7A of the Threatened Species Conservation Act 1995;
- The subject site is not identified on a Bush Fire Prone Land map certified by the commissioner of the NSW Rural Fire service as being bush fire prone land as per the Rural Fires and Environmental Assessment Legislation Amendment Act 2002 No 67;
- The subject site is not part of a Property Vegetation Plan under Native Vegetation Act 2003;
- There has not been an order made under the Trees (Disputes between Neighbours) Act 2006 to carry out work in relation to a tree on the land;
- The subject site has no direction in force under section 75P (2)(c1) of the Environmental Planning and Assessment Act 1979; and
- The subject site has no known matters arising under the CLM Act as per Section 59(2) of the CLM Act. Specifically:
    - The land to which this certificate relates IS NOT significantly contaminated land;
    - The land to which this certificate relates IS NOT subject to a management order;
    - The land to which this certificate relates IS NOT the subject of an approved voluntary management proposal;
    - The land to which this certificate relates IS NOT subject to an ongoing maintenance order; and
    - The land to which this certificate relates IS NOT subject to a site audit statement.

3.3 Previous Site Contamination Investigation Reports

A preliminary site investigation of Lot 2 of DP 549570 (EIS 2012) infers the following key aspects:

- Identified AOC and associated COPC comprised:
    - Use of uncontrolled fill across the site - heavy metals, petroleum hydrocarbons, volatile and semi-volatile organic solvents (e.g. BTEX, VOCs and PAHs), pesticides (e.g. OCPs and OPPs), electrical transformer fluids (e.g. PCBs) and asbestos;
    - Historical industrial activities at the site - heavy metals, petroleum hydrocarbons, volatile and semi-volatile organic solvents (e.g. BTEX, VOCs and PAHs) and asbestos;
    - Chemical storage, including use of a underground storage tank (UST) located on the south-western segment of the site (location shown on the plan excerpt from the report in Attachment 9) - petroleum hydrocarbons, volatile and semi-volatile organic solvents (e.g. BTEX, VOCs and PAHs) and lead;
    - Presence of an electrical substation (actually present upon the south-western corner of the subject site) - electrical transformer fluids (e.g. PCBs);
    - Demolition of buildings over the history of the site – asbestos.

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

- An investigation of the fill horizon around the site perimeter (seven boreholes at locations shown on the plan excerpt from the report in Attachment 9 and a total of 11 soil samples) suggested the following:
    - An elevated concentration of toluene [3 mg/kg which was above the Service Station Guideline value of 1.4 mg/kg (NSW EPA 1994)] was encountered in the fill horizon in the south-western area of the site (specifically at BH7, between 0.1 and 0.3 m below ground level [BGL]). However a deeper sample of fill material at the same borehole (specifically BH7, between 0.5 to 0.7 m BGL) reported an absence of detectable toluene (i.e. below the reporting limit of 0.5 mg/kg);
    - A detectable concentration of benzene [0.4 mg/kg which was below the Service Station Guideline value of 1.0 mg/kg (NSW EPA 1994)] was encountered in the fill horizon in the north-western area of the site (specifically at BH1, between 0.6 and 0.8 m BGL);
    - PID readings did not suggest the presence of gross contamination in relation to volatile organic solvents (i.e. results ranged from 0 to 7.2 parts per million [ppm] equivalent isobutylene);
    - A detectable concentration of C_{10}-C_{36} petroleum hydrocarbons [110 mg/kg which was below the Service Station Guideline value of 1000 mg/kg (NSW EPA 1994)] was encountered in the fill horizon in the southern area of the site (specifically at BH6, between 0.1 to 0.2 m BGL);
    - All samples reported concentrations of heavy metals, total PAHs and benzo(a)pyrene below the adopted criteria (NEPM 1999 (NEPC Guidelines) HILs - Column D 'Residential with minimal opportunities for soil access);
    - All samples reported concentrations of OCPs, OPPs, PCBs, TPH C_6-C_9, TPH C_{10}-C_{14}, TPH C_{15} – C_{28}, ethyl benzene and total xylenes below the reporting limit;
    - An absence of observed asbestos in the fill horizon and all soil samples reported below the reportable limit for asbestos;
    - The following strata at the site:
        - Fill comprising (a mixture of sandy gravels, sand, clay and crushed shale), underlying concrete / asphalt and ranging in depth from 0.3 to 1.1 m BGL in all locations other than BH7 where it extended to a depth of 3.6 m BGL. No groundwater or gross contamination was encountered within the fill horizon.
        - Underlying shale bedrock that comprises fine and medium grained sandstone, generally slightly weathered or fresh. The sandstone contains bands which are inter-bedded with shale. No groundwater or gross contamination was encountered up to the maximum depth of investigation (which varied from 6.8 to 10.2 m BGL).
- The report's conclusions and recommendations were made in relation to the mixed-use development (i.e. Clause 7 of State Environmental Planning Policy No 55—Remediation of Land, Contamination and remediation to be considered in determining development application) rather than a determination of whether the subject site is suitable for rezoning to B4 Mixed Use in accordance with Clause 6 of SEPP 55. Specifically, 'the site could be made suitable for the proposed mixed-use development' providing the following items are addressed prior to development of the site:

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

- An additional soil and groundwater investigation should be undertaken at the site. The investigation should be designed to meet the minimum sampling density and should also include: targeted investigations in the vicinity of the suspected UST, BH1 and BH7; and the installation of a minimum of four groundwater monitoring wells, with at least one of the wells located adjacent to and down gradient of the suspected UST;
- Following completion of the additional investigation, a remedial action plan (RAP) should be prepared for the site. The RAP should be implemented during the proposed development works and a suitable site validation report should be prepared on completion of the remediation; and
- Prior to the demolition of any structures on site, a suitably qualified asbestos consultant should be engaged to undertake a hazardous building materials survey of the buildings. The demolition works should be undertaken appropriately based on the findings of the survey.

3.4 Waste Service Infrastructure

The sewerage infrastructure upon the subject site comprises several lines from the above ground infrastructure to a discharge line on the western end of the southern boundary (refer to Attachment 10). The sewerage infrastructure upon Lot 2 of DP 549570 comprises several lines at the western end of the aboveground infrastructure that discharges to a main upon Tennyson Road.

3.5 Search for Schedule 11 Hazardous Chemicals

A search for Schedule 11 Hazardous Chemicals records associated with the subject site was not undertaken as part of this Phase 1 ESA. Historical dangerous goods licensing information associated with the immediately neighbouring Lot 2 of DP 549570 suggests use of underground storage tanks to store petrol (12,000 litre [L] tank in a central area of the site) and mineral spirit (2,000 L tank in a southern area of the site) ceased in 1992 (refer to Attachment 11).

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

4 ENVIRONMENTAL SETTING

4.1 TOPOGRAPHY AND DRAINAGE

The following summary inferred based upon review of aerial photography, elevation data and contour map information provided by Google Earth (2015):

- The subject site, Lot 2 of DP 549570 and Lot 2 of DP 539330 is covered in concrete / asphalt hardstand with the exception of small landscaped areas. On that basis infiltration to the underlying fill horizon at the subject site, Lot 2 of DP 549570 and Lot 2 of DP 539330 is likely to be very limited;
- Surface drainage across the subject site and Lot 2 of DP 539330 is likely to be in north to south direction as result of a fall in elevation of approximately 50 to 52 m AHD on the Victoria Road boundary of Lot 2 of DP 539330 to approximately 35 to 36 m AHD on the southern boundary of the subject site;
- Lot 2 of DP 549570 represents a topographic depression both in relation to Lot 2 of DP 539330 (approximately 49 m AHD down to 37 m AHD on the northern boundary of Lot 2 of DP 549570) and in relation to the subject site (approximately 34 m AHD to 36 m AHD on the southern boundary of Lot 2 of DP 549570). On that basis Lot 2 of DP 549570 is likely to receive run-off from both Lot 2 of DP 539330 and the subject site; and
- There is a drop of approximately 1 to 2 m between the subject site and the residential properties to the south and east, suggesting a fill horizon was used to establish current site levels.
- The nearest surface water bodies to the subject site is Glades Creek located 520 metres south of the site, and Grove Creek located 600 metres south-west of the site.

4.2 GEOLOGY AND SOILS

4.2.1 Geology

Based on the geological mapping information (GSNSW 1983; Chapman and Murphy 1989), the subject site is underlain by the Wianamatta Group Ashfield Shale and the Bringelly Shale formations. The Ashfield Shale is comprised of laminate and dark grey shale while the Bringelly Shale consists of shale, calcareous claystone, laminate, fine to medium grained lithic-quartz sandstone.

4.2.2 Probable Subject Site Strata

Although an intrusive investigation was not part of the scope of this Phase 1 ESA, the following can be inferred from the intrusive investigation of Lot 2 of DP 549570 (EIS 2012) and natural soil mapping information (Chapman and Murphy 1989):

- A fill horizon will be present as it would have been required to achieve current site levels upon the underlying natural north to southern sloping terrain. Assuming similarity with the immediately neighbouring Lot 2 of DP 549570 (which has a similar site history) it is likely to comprise a mixture of sandy gravels, sand, clay and crushed shale and be up to 1 to 2 metres thick (based upon relative levels of the subject site and the residential properties to the south and east;
- If any natural soils are present they would underlie the fill and possibly comprise the following (Chapman and Murphy 1989):

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

- Hardsetting brown clay loam (gn2): commonly a clay loam to find sandy clay loam with an a pedal massive or weakly pedal structure and an earthy or porous, rough-faced ped fabric; sub-angular blocky; pH ranges from strongly acidic (pH 4.0) and moderately acidic (pH 6.0);
- Whole coloured, reddish-brown (gn3): medium clay with strongly pedal structure and smooth-faced, dense, pedal fabric; sub-angular blocky or polyhedral; pH ranges from strongly acidic (pH 4.0) and moderately acidic (pH 5.5); and
- Mottled grey plastic clay (gn4): grey mottled, medium to heavy clay with strongly pedal structure and dense, smooth ped fabric; sub-angular blocky; strongly acidic (pH 4.0) and moderately acidic (pH 5.0).

> The fill horizon and natural soils (if present) would overlie shale bedrock of similar composition to that encountered upon Lot 2 of DP 549570 (i.e. fine and medium grained sandstone, generally slightly weathered or fresh and with a low probability of encountering groundwater for several metres).

4.2.3 Occurrence of Acid Sulfate Soils

According to regional acid sulphate soil mapping information (NSW L&W 1997) suggests a low probability of encountering acid sulfate soils.

According to the Ryde Local Environmental Plan acid sulphate soil mapping information (Ryde LEP 2014a), the south-west corner of the subject site is a Class 5 acid sulfate soil area (refer to Figure 6).

A Class 5 acid sulfate soil area pertains to making Council aware of dewatering activities that are likely to lower the water table of Class 1, 2, 3 or 4 acid sulfate soil areas. This is not likely to be an issue of concern at the subject site or Lot 2 of DP 549570 as the underlying bedrock is at elevation well above 5 m AHD and is not likely to require dewatering as per the currently proposed concept plan (i.e. groundwater is absent for at least the depth of the cut into the bedrock required by the proposed basement).

4.3 Hydro-geology and Beneficial Groundwater Use

The following key aspects can be inferred from the intrusive investigation of Lot 2 of DP 549570 (EIS 2012) and drainage (refer to Section 4.1);

> Limited perched water flow in the fill horizon as a result of a predominance of hardstand areas upon the subject site, Lot 2 of DP 549570 and Lot 2 of DP 539330;

> A relative absence of groundwater within the underlying bedrock to at least the depth of the cut into the bedrock required by the proposed concept plan basement;

> The bedrock is likely to represent an aquitard to perched water within the fill horizon as a result of its observed competence (EIS 2012) and the typically very low hydraulic conductivity of fine grained sandstones and shale (Domenico and Schwartz 1990);

A search of the Department of Primary Industries (DPI) Office of Water (2016) was undertaken on 24 May 2017 for bores in the vicinity of the subject site. Eleven registered bores were located within 500 metres of the subject site. The eleven registered bores are: GW108361, GW108362, GW108363, GW108364, GW108365, GW108366, GW108367, GW109573, GW109574, GW109575 and GW109576. All of the registered bores are located southeast of the site, with the exception of GW108366 which is located northeast of the site. All the registered bores are registered for monitoring purposes only. Four of the eleven registered bores have an active license status while the remaining bores are cancelled. There are

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

no records of bore construction or groundwater use. As such, it can be concluded that the groundwater in the vicinity of the subject site is not used for beneficial groundwater use.

4.3.1 Surface Water

Surface water bodies are not identified on the subject site, and are not expected to appear due to the location and current use of the subject site. The nearest surface water bodies to the subject site is Glades Creek located 520 metres south of the site, and Grove Creek located 600 metres southwest of the site.

Lot 2 DP 539330 (north of the site) has a higher elevation than the subject site, by approximately 10 to 15 metres. It is expected that majority of surface runoff from Lot 2 DP 539330 would flow off the hardstand areas and building roofs, and enter the regional stormwater infrastructure located on Farm Street and Tennyson Road. However, some runoff may enter the subject site due to the regional topography.

5 CHARACTERIZATION OF POTENTIAL CONTAMINATION ISSUES

The following sections are based upon site historical information (Section 3) and environmental setting information (Section 4) as a detailed site inspection of the subject site was not undertaken as part of this investigation.

5.1 PAST OR CURRENT ACTIVITIES THAT MAY HAVE CONTAMINATED THE SUBJECT SITE

The following past or current activities that may have contaminated the subject site comprise:

- Presence of a fill horizon using materials of unknown origin to establish current site levels;
- Historical activities associated with the following industrial operations:
    - Brickworks (1920s until late 1940s) – operation of vehicle maintenance facilities (e.g. lubricant and fuel storage) and use of additives for kilning of the bricks (e.g. manganese and barium salts);
    - Shoe machinery and shoe material manufacturing (late 1940s until late 1960s) – machinery manufacturing (cleaning solvents, storage of fuels and lubricants), shoe material manufacturing (e.g. various solvents associated with plastics, rubbers and polymers and adhesives) and operation of vehicle maintenance facilities (e.g. lubricant and fuel storage). Fuels, lubricants and solvents may have been stored in bulk in above or below ground storage tanks;
    - Painting equipment manufacturing (late 1960s until 1990s – manufacturing of brushes, rollers and paint trays (e.g. various solvents associated with plastics, rubbers and polymers and adhesives) and operation of vehicle maintenance facilities (e.g. lubricant and fuel storage). Fuels, lubricants and solvents may have been stored in bulk in above or below ground storage tanks;
    - Current light commercial activities (storage of small volumes of cleaning solvents, adhesives and sealant chemicals);
- Use of water treatment infrastructure for off-site discharge to sewer or storm water (possible but unconfirmed use from the 1950s until the 1990s) (e.g. treatment of residual amounts of solvents, fuels, lubricants and factory floor run-off);
- Operation and maintenance of an electrical substation (leased to Sydney County Council) located close to the western boundary (based upon design appearance has been present from 1960s/1970s until current day);
- Demolition of aboveground structures that may have been made of asbestos (e.g. redevelopment of the subject site and immediately surrounding sites: late 1940s / early 1950s, late 1960s / early 1970s and in the 1990s).

5.2 AREAS OF CONCERN (AOC) AND CONTAMINANTS OF POTENTIAL CONCERN (COPC)

Table 2 provides a summary of AOC and COPC for the subject site. It is based upon the fore mentioned activities that may have contaminated the subject site.

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

Table 2: AOC and COPC

Past or Current Activities that have Possibly Contaminated the Site	Areas of Concern (AOC)	Contaminants of Potential Concern (COPC)
Fill horizon using materials of unknown origin.	Across the whole subject site and off-site up gradient areas to the north (e.g. Lot 2 of DP 549570 and Lot 2 of DP 539330) - underlying concrete / asphalt hardstand and overlying bedrock.	Heavy metals, petroleum hydrocarbons, volatile and semi-volatile organic solvents (e.g. BTEX, VOCs and PAHs), pesticides (e.g. OCPs and OPPs) and asbestos.
Brickworks (1920s until late 1940s) – operation of vehicle maintenance facilities (e.g. lubricant and fuel storage) and use of additives for kilning of the bricks (e.g. manganese and barium salts).	Not possible to clearly identify. If residual impacts are present most likely within fill horizon that underlies hardstand and overlies bedrock. Across the whole site and off-site up gradient areas to the north (e.g. Lot 2 of DP 549570 and Lot 2 of DP 539330).	Petroleum hydrocarbons and metals such as manganese and barium
Shoe machinery and shoe material manufacturing (late 1940s until late 1960s) and other immediately surrounding commercial operations – machinery manufacturing (cleaning solvents, storage of fuels and lubricants), shoe material manufacturing (e.g. various solvents associated with plastics, rubbers and polymers and adhesives) and operation of vehicle maintenance facilities (e.g. lubricant and fuel storage). Fuels, lubricants and solvents may have been stored in bulk in above or below ground storage tanks.	Not possible to clearly identify. If residual impacts are present most likely within fill horizon that underlies hardstand and overlies bedrock with particular note to locations of formerly operating USTs (presence/absence of historical USTs has yet to be confirmed). Across the whole subject site and off-site up gradient areas to the north (e.g. Lot 2 of DP 549570 and Lot 2 of DP 539330).	Petroleum hydrocarbons and volatile and semi-volatile organic solvents (e.g. BTEX, VOCs and PAHs)

5.3 LAND USE IMPLICATIONS

5.3.1 Current Land Uses

The current land use/s of the subject site do not represent a significant risk of harm to human health or the environment in relation to the AOC and COPC that have been identified as part of this Phase 1 ESA based upon the following lines of evidence:

- Storage of cleaning solvents, adhesives and sealant chemicals for current light commercial operators upon the subject site is limited to small volumes that are stored upon hardstand;
- The importation of fill of unknown origin occurred late 1940s / early 1950s and late 1960s / early 1970s and since that time has remained relatively undisturbed and covered by concrete / asphalt hardstand (i.e. the only areas that may have been disturbed in the last 40 years would be associated with the installation of sub-surface pipe work and or building footings);
- Human occupation of the subject site over the last 20 years has been limited to light commercial land use with no direct exposure to the fill horizon;
- Absence of persistent primary sources of fuels, lubricants, volatile and semi-volatile organic solvents in the fill horizon:
    - If bulk chemical storage of fuels, lubricants, volatile and semi-volatile organic solvents (either in aboveground storage tanks or USTs) did occur at the subject site or at Lot 2 of DP 549570 or at Lot 2 of DP 539330 this would have most likely ceased in the early 1990s. Although neither a inspection or search for Schedule 11 Hazardous Chemicals was undertaken for the subject site or adjacent sites, this assumption is reasonable based upon the following lines of evidence:
        - Painting equipment manufacturing could have only occurred up until 1995 (i.e. when lands owned by Rota Cota Pty Ltd were transferred);
        - Current light commercial activities upon the subject site only require storage of small volumes of cleaning solvents, adhesives and sealant chemicals;
        - Historical dangerous goods licensing information associated with the immediately neighbouring Lot 2 of DP 549570 (which has a site history very similar to the subject site) suggests use of underground storage tanks for storage of fuels and mineral spirits ceased in 1992.
    - If water treatment infrastructure for off-site discharge to sewer or storm water was present at the subject site or at Lot 2 of DP 549570 or at Lot 2 of DP 539330 this would have most likely ceased in the early 1990s. This is supported by the following lines of evidence:
        - Painting equipment manufacturing could have only occurred up until 1995 (i.e. when lands owned by Rota Cota Pty Ltd were transferred); and
        - Current light commercial activities upon the subject site do not require such infrastructure (i.e. where manufacturing activities occur they are limited to product assembly and warehousing).
- Sampling and laboratory test work upon Lot 2 of DP 549570 (which has a site history very similar to the subject site) suggests the following:

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

- An absence of gross contamination of petroleum hydrocarbons, volatile and semi-volatile organic solvents, pesticides or metals in either the fill horizon or the underlying bedrock. This site is located immediately adjacent to the subject site and its fill horizon is a potential receiver of mobile gross contamination from the subject site and Lot 2 of DP 539330 as it is located in a former quarry pit (i.e. is topographically depressed relative to the other sites);
- An absence of either observed of laboratory detectable levels of asbestos.

> The electrical substation (leased to Sydney County Council) located close to the western boundary appears to be in relatively good condition and if surface soils were impacted by PCBs, impacted volumes are likely to be limited to shallow soils within the immediate footprint of the electrical substation;

> There are no beneficial groundwater uses within 500 metres of the subject site (i.e. no groundwater wells used for either agriculture or drinking water);

> There are no natural surface water bodies within 500 metres of the subject site; and

> Although a ground water investigation has not been undertaken in relation to the subject site or Lot 2 of DP 549570 and it is unknown whether a groundwater investigation has been undertaken in relation to Lot 2 of DP 539330, groundwater flow in the vicinity of the subject site is likely to be limited by the following aspects in terms of potential down gradient reception:

- Concrete / asphalt hardstand that covers most of the site will significantly limit infiltration to groundwater. This was supported by an observed absence of groundwater in the fill upon Lot 2 of DP 549570 (EIS 2012); and
- Water within the fill horizon is likely to be confined by the underlying bedrock unit is likely to have very low hydraulic conductivity (i.e. as it is comprised of competent sandstones and shales). This was supported by an observed absence of groundwater in the bedrock up to a depth of 10.2 m BGL upon Lot 2 of DP 549570 (EIS 2012).

5.3.2 Change of zoning from IN2 Light Industrial to B7 Business Park

Change of zoning from IN2 Light Industrial to B4 Mixed Use does not change the risk profile associated with the site, specifically risk of harm to human health or the environment based upon the following lines of evidence:

> The subject site is currently zoned IN2 Light Industrial and current land use/s have been evaluated as not representing a significant risk of harm to human health or the environment;

> The nature of the proposed concept plan will require removal of all fill in the vicinity of the basement car parking area and the lowest residential units. Additionally, surrounding areas would comprise a mixture of hardstand pavement and landscaped areas (levels established via importation of clean engineered fill and landscaping soils);

> Even if the COPC were encountered at the site, significant risk of harm to human health or the environment could be readily mitigated (i.e. delineation and removal of impacted soils and or perched groundwater to an appropriately NSW EPA licensed waste facility); and

> All newly proposed land uses and or developments must be approved by Council as part of the planning approval process under the EP&A Regulations 2000.

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

6 CONCLUSIONS AND RECOMMENDATIONS

Review of the site history, environmental setting and site inspection has identified the following AOC and COPC:

- Fill horizon in relation to several sources of COPC:
  - Use of uncontrolled fill - heavy metals, petroleum hydrocarbons, volatile and semi-volatile organic solvents (e.g. BTEX, VOCs and PAHs), pesticides (e.g. OCPs and OPPs) and asbestos;
  - Brickworks (1920s until late 1940s) with probable operation of vehicle maintenance facilities (e.g. lubricant and fuel storage) and use of additives for kilning of the bricks (e.g. manganese and barium salts) - Petroleum hydrocarbons and metals such as manganese and barium;
  - Shoe machinery and shoe material manufacturing (late 1940s until late 1960s) and other commercial operators at the subject site and surrounding sites had fuels, lubricants and solvents stored in bulk in above or below ground storage tanks and are likely to have had water treatment infrastructure with discharge lines running through the fill horizon - petroleum hydrocarbons and volatile and semi-volatile organic solvents (e.g. BTEX, VOCs and PAHs);
  - Painting equipment manufacturing (late 1960s until 1990s – manufacturing of brushes, rollers and paint trays) and other commercial operators at the subject site and surrounding sites had fuels, lubricants and solvents stored in bulk in above or below ground storage tanks and are likely to have had water treatment infrastructure with discharge lines running through the fill horizon - petroleum hydrocarbons and volatile and semi-volatile organic solvents (e.g. BTEX, VOCs and PAHs).
  - Demolition of aboveground structures that may have been made of asbestos that may have impacted exposed fill (e.g. redevelopment of the subject site: late 1940s / early 1950s, late 1960s / early 1970s and in the 1990s).
- Operation and maintenance of an electrical substation (leased to Sydney County Council) located close to the western boundary (based upon design appearance has been present from 1960s/1970s until current day) – PCBs; and
- Current light commercial activities (storage of small volumes of cleaning solvents, adhesives and sealant chemicals upon hardstand areas) - volatile and semi-volatile organic solvents.

Current land use/s of the subject site do not represent a significant risk of harm to human health or the environment based (refer to Section 5.3.1 for detail).

Change of zoning from IN2 Light Industrial to B4 Mixed Use does not change the risk profile associated with the site, specifically risk of harm to human health or the environment based upon the following lines of evidence:

- The subject site is currently zoned IN2 Light Industrial and current land use/s have been evaluated as not representing a significant risk of harm to human health or the environment;

© SNC-Lavalin Australia Pty Ltd. 2017. All rights reserved. Confidential.

- The nature of the proposed concept plan will require removal of all fill in the vicinity of the basement car parking area and the lowest residential units. Additionally, surrounding areas would comprise a mixture of hardstand pavement and landscaped areas (levels established via importation of clean engineered fill and landscaping soils);
- Even if the COPC were encountered at the site, significant risk of harm to human health or the environment could be readily mitigated (i.e. delineation and removal of impacted soils and or disposal of perched groundwater to an appropriately NSW EPA licensed waste facility); and
- All newly proposed land uses and or developments must be approved by Council as part of the planning approval process under the EP&A Regulations 2000.

On that basis the subject site is suitable for rezoning to B4 Mixed Use in accordance with Clause 6 of SEPP 55.

It should be noted the following should be undertaken prior to development of the subject site:

- Detailed visual inspection and where necessary use of ground penetrating radar survey to confirm the presence / absence of USTs and subsurface water treatment infrastructure at the subject site;
- Removal of all USTs as per relevant guidelines (DECCW 2009);
- A Phase 2 ESA that seeks to further qualify key risks associated with earthworks and management of soils and groundwater. It should be undertaken in accordance with all relevant guidelines under the CLM Act and as a minimum the sampling and analysis plan must qualify the nature and extent of soil and groundwater contamination that maybe associated with the fore mentioned AOC and COPC; and
- Results of the Phase 2 ESA can then be utilized to inform the Construction Environmental Management Plan (CEMP) for the development in a manner that complies with both SEPP 55 and the POEO Act (e.g. inform characterization of spoil for offsite disposal to a NSW EPA licensed land fill).

ATTACHMENT 2 – COUNCIL LETTER REGARDING GATEWAY DETERMINATION

City of Ryde

Lifestyle and opportunity @ your doorstep

Ms Joandarc Khouzame
Director Darcsol Pty Ltd
PO BOX 1411
NEWTOWN 2042

18 May 2017

LEP2013/15/004

Dear Ms Khouzame

Planning Proposal 2-14 Tennyson Road Gladesville
(Department Ref PP_2016_RYDEC_002_00)

You are advised that the Department of Planning and Environment on the 11 May 2017 issued an Alteration of Gateway Determination for the subject Planning Proposal. The alterations included replacing Condition 1 of the Gateway Determination issued on the 21 April 2016 and extending the time for the LEP to be completed until 28 April 2018. .

A copy of the Alteration of the Gateway Determination is enclosed for your information.

Condition 1 of the Alteration of the Gateway Determination requires prior to community consultation that the Planning Proposal be updated to comply with the following:

- A maximum floor space ratio of 1.85:1 at 2-12 Tennyson and 1:1 at 14 Tennyson Road
- A maximum building height of RL66.60 at 2 – 12 Tennyson Road and RL50.04 at 14 Tennyson Road
- Address the inconsistency with Section 117 Direction 1.1 Business and Industrial Zones
- Demonstrate consistency with a Plan for Growing Sydney and the draft North District Plan
- Include maps prepared to the Department of Planning and Environments standards.

You are advised that to satisfy the Gateway Determination it will be necessary to submit to Council an amended Planning Proposal that complies with the

City of Ryde

Lifestyle and opportunity @ your doorstep

conditions of the Gateway Determination of the 21 April 2016 and as amended by the Alteration of Gateway Determination issued on the 11 May 2017.

As you have been previously advised it is also necessary for a contamination report of the property 2 – 12 and 14 Tennyson Road Gladesville to be undertaken prior to exhibition.

Should you have any enquiries regarding the above please contact Susan Wotton –Strategic Planner on 9952 8204.

Yours sincerely

Lexie Macdonald

NSW GOVERNMENT | Planning & Environment

Alteration of Gateway Determination

Planning proposal (Department Ref: PP_2016_RYDEC_002_00)

I, the Deputy Secretary, Planning Services at the Department of Planning and Environment as delegate of the Greater Sydney Commission, have determined under section 56(7) of the *Environmental Planning and Assessment Act 1979* (the Act) to alter the Gateway determination dated 21 April 2016 for the proposed amendment to the Ryde Local Environmental Plan 2014 as follows:

1. Delete condition 1 and replace with a new condition 1:

    1. Prior to community consultation, the planning proposal is to be updated to:
        (a) apply a maximum floor space ratio of 1.85:1 at 2-12 Tennyson Road and 1:1 at 14 Tennyson Road;
        (b) apply a maximum building height of RL 66.60 at 2-12 Tennyson Road and RL 50.04 at 14 Tennyson Road;
        (c) address the inconsistency with Section 117 Direction 1.1 Business and Industrial Zones;
        (d) demonstrate consistency with *A Plan for Growing Sydney* and the draft North District Plan; and
        (e) include maps prepared to the standards identified in *Standard Technical Requirements for Spatial Datasets and Maps* (Department of Planning and Environment 2015).

2. Delete condition 6 and replace with a new condition 6:

    6. The LEP is to be completed by 28 April 2018.

Dated 11th day of May 2017

Marcus Ray
Deputy Secretary
Planning Services
Department of Planning and Environment

Delegate of the Greater Sydney Commission

Refine Search

did not find any records in our database.

If a site does not appear on the record it may still be affected by contamination. For example:

- Contamination may be present but the site has not been regulated by the EPA under the Contaminated Land Management Act 1997 or the Environmentally Hazardous Chemicals Act 1985.
- The EPA may be regulating contamination at the site through a licence or notice under the Protection of the Environment Operations Act 1997 (POEO Act).
- Contamination at the site may be being managed under the planning process.

Search TIP

To search for a specific site, search by LGA (local government area) and carefully review all sites listed.

... more search tips

More information about particular sites may be available from:

- The POEO public register
- The appropriate planning authority: for example, on a planning certificate issued by the local council under section 149 of the Environmental Planning and Assessment Act.

See What's in the record and What's not in the record.

If you want to know whether a specific site has been the subject of notices issued by the EPA under the CLM Act, we suggest that you search by Local Government Area only and carefully review the sites that are listed.
This public record provides information about sites regulated by the EPA under the Contaminated Land Management Act 1997, including sites currently and previously regulated under the Environmentally Hazardous Chemicals Act 1985. Your inquiry using the above search criteria has not matched any record of current or former regulation. You should consider searching again using different criteria. The fact that a site does not appear on the record does not necessarily mean that it is not affected by contamination. The site may have been notified to the EPA but not yet assessed, or contamination may be present but the site is not yet being regulated by the EPA. Further information about particular sites may be available from the appropriate planning authority, for example, on a planning certificate issued by the local council under section 149 of the Environmental Planning and Assessment Act. In addition the EPA may be regulating contamination at the site through a licence under the Protection of the Environment Operations Act 1997. You may wish to search the POEO public register.POEO public register

ATTACHMENT 6 – NSW EPA CONTAMINATED SITES REGISTER

List of NSW Contaminated Sites Notified to EPA as of 8 May 2017

Background

A strategy to systematically assess, prioritise and respond to notifications under Section 60 of the *Contaminated Land Management Act 1997* (CLM Act) has been developed by the EPA. This strategy acknowledges the EPA's obligations to make information available to the public under *Government Information (Public Access) Act 2009*.

When a site is notified to the EPA, it may be accompanied by detailed site reports where the owner has been proactive in addressing the contamination and its source. However, often there is minimal information on the nature or extent of the contamination.

For some notifications, the information indicates the contamination is securely immobilised within the site, such as under a building or carpark, and is not currently causing any offsite consequences to the community or environment. Such sites would still need to be cleaned up, but this could be done in conjunction with any subsequent building or redevelopment of the land. These sites may not require intervention under the CLM Act, but could be dealt with through the planning and development consent process.

Where indications are that the nominated site is causing actual harm to the environment or an unacceptable offsite impact (i.e. it is a "significantly contaminated site"), the EPA would apply the regulatory provisions of the CLM Act to have the responsible polluter and/or landowner investigate and remediate the site.

As such, the sites notified to the EPA and presented in the following table are at various stages of the assessment and/or remediation process. Understanding the nature of the underlying contamination, its implications and implementing a remediation program where required, can take a considerable period of time. The tables provide an indication, in relation to each nominated site, as to the management status of that particular site. Further detailed information may be available from the EPA or the responsible landowner.

The following questions and answers may assist those interested in this issue:

Frequently asked questions

What is the difference between the "List of NSW Contaminated Sites Notified to the EPA" and the "Contaminated Land: Record of Notices"?

A site will be on the Contaminated Land: Record of Notices only if the EPA has issued a regulatory notice in relation to the site under the *Contaminated Land Management Act 1997*.

The sites appearing on this "List of NSW contaminated sites notified to the EPA" indicate that the notifiers consider that the sites are contaminated and warrant reporting to the EPA. However, the contamination may or may not be significant enough to warrant regulation by the EPA. The EPA needs to review and, if necessary, obtain more information before it can make a determination as to whether the site warrants regulation.

Why my site appears on the list?

Your site appears on the list because of one or more of the following reasons:

- The site owner and/or the person partly or fully responsible for causing the contamination notified to the EPA about the contamination under Section 60 of the *Contaminated Land Management Act 1997*. In other words, the site owner or the "polluter" believes the site is contaminated.
- The EPA has been notified via other means and is satisfied that the site is or was contaminated.

Does the list contain all contaminated sites in NSW?

No. The list only contains contaminated sites that the EPA is aware of, with regard to its regulatory role under the CLM Act. An absence of a site from the list does not necessarily imply the site is not contaminated.

The EPA relies upon responsible parties to notify contaminated sites.

How are these notified contaminated sites managed by the EPA?

There are different ways that the EPA manages these notified contaminated sites. First, an initial assessment is carried out by the EPA. At the completion of the initial assessment, the EPA may take one or more than one of the following management approaches:

- The contamination warrants the EPA's direct regulatory intervention either under the *Contaminated Land Management Act 1997* or the *Protection of the Environment Operations Act 1997* (POEO Act), or both. Information about current or past regulatory action on this site can be found on EPA website.
- The contamination with respect to the current use or approved use of the site, as defined under the *Contaminated Land Management Act 1997,* is not significant enough that it warrants EPA regulation.
- The contamination does not require EPA regulation and can be managed by a planning approval process.
- The contamination is related to an operational Underground Petroleum Storage System, such as a service station or fuel depot. The contamination may be managed under the POEO Act and the Protection of the Environment Operation (Underground Petroleum Storage Systems) Regulation 2008.
- The contamination is being managed under a specifically tailored program operated by another agency (for example the Department of Industry and Investment's *Derelict Mines Program*).

I am the owner of a site that appears on the list. What should I do?

First of all, you should ensure the current use of the site is compatible with the site contamination. Secondly, if the site is the subject of EPA regulation, make sure you comply with the regulatory requirements, and you have considered your obligations to notify other parties who may be affected.

If you have any concerns, contact us and we may be able to offer you general advice, or direct you to accredited professionals who can assist with specific issues.

I am a prospective buyer of a site that appears on the list. What should I do?

You should seek advice from the vendor to put the contamination issue into perspective. You may need to seek independent expert advice.

The information provided in the list is meant to be indicative only, and a starting point for your own assessment. Site contamination as a legacy of past site uses is not uncommon,

particularly in an urbanised environment. If the contamination on a site is properly remediated or managed, it may not materially impact upon the intended future use of the site. However, each site needs to be considered in context.

List of NSW Contaminated Sites Notified to the EPA

Disclaimer

The EPA has taken all reasonable care to ensure that the information in the list of contaminated sites notified to the EPA (the list) is complete and correct. The EPA does not, however, warrant or represent that the list is free from errors or omissions or that it is exhaustive.

The EPA may, without notice, change any or all of the information in the list at any time.

You should obtain independent advice before you make any decision based on the information in the list.

The list is made available on the understanding that the EPA, its servants and agents, to the extent permitted by law, accept no responsibility for any damage, cost, loss or expense incurred by you as a result of:

1. any information in the list; or
2. any error, omission or misrepresentation in the list; or
3. any malfunction or failure to function of the list;
4. without limiting (2) or (3) above, any delay, failure or error in recording, displaying or updating information.

Site Status	Explanation
Under assessment	The contamination is being assessed by the EPA to determine whether regulation is required. The EPA may require further information to complete the assessment. For example, the completion of management actions regulated under the planning process or *Protection of the Environment Operations Act 1997*. Alternatively, the EPA may require information via a notice issued under s77 of the *Contaminated Land Management Act 1997* or issue a Preliminary Investigation Order.
Regulation under CLM Act not required	The EPA has completed an assessment of the contamination and decided that regulation under the *Contaminated Land Management Act 1997* is not required.
Regulation being finalised	The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the *Contaminated Land Management Act 1997*. A regulatory approach is being finalised.

Contamination currently regulated under CLM Act	The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the *Contaminated Land Management Act 1997* (CLM Act). Management of the contamination is regulated by the EPA under the CLM Act. Regulatory notices are available on the EPA's Contaminated Land Public Record.
Contamination currently regulated under POEO Act	The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. Management of the contamination is regulated under the *Protection of the Environment Operations Act 1997* (POEO Act). The EPA's regulatory actions under the POEO Act are available on the POEO public register.
Contamination being managed via the planning process (EP&A Act)	The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. The contamination of this site is managed by the consent authority under the *Environmental Planning and Assessment Act 1979* (EP&A Act) planning approval process, with EPA involvement as necessary to ensure significant contamination is adequately addressed. The consent authority is typically a local council or the Department of Planning and Environment.
Contamination formerly regulated under the CLM Act	The EPA has determined that the contamination is no longer significant enough to warrant regulation under the *Contaminated Land Management Act 1997* (CLM Act). The contamination was addressed under the CLM Act.
Contamination formerly regulated under the POEO Act	The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed under the *Protection of the Environment Operations Act 1997* (POEO Act).
Contamination was addressed via the planning process (EP&A Act)	The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed by the appropriate consent authority via the planning process under the *Environmental Planning and Assessment Act 1979* (EP&A Act).
Ongoing maintenance required to manage residual contamination (CLM Act)	The EPA has determined that ongoing maintenance, under the *Contaminated Land Management Act 1997* (CLM Act), is required to manage the residual contamination. Regulatory notices under the CLM Act are available on the EPA's Contaminated Land Public Record.

ATTACHMENT 7 – NSW OEH HERITAGE SEARCH

Search for NSW heritage

Your search did not return any matching results. Please refine your search and try again.

The State Heritage Inventory is a list of heritage items in New South Wales including Aboriginal Places, State Heritage Register, Interim Heritage Orders, State Agency Heritage Registers and Local Environmental Plans.

The Heritage Division is directly responsible for maintaining **Aboriginal Places** and the **State Heritage Register**. A new **combined map search** is now available. For further information about Aboriginal Places and Sites refer to **AHIMS Web Services**

Whilst the Heritage Division seeks to keep the Inventory up to date, it is reliant on State agencies and local councils to provide their data. Always check with the relevant State agency or local council for the most up-to-date information.

Visit **State Heritage Inventory help** if you are unfamiliar with this search facility.

***View owner organisation names for section 170 heritage and conservation registers**

Search Aboriginal Places & State Heritage Register

The combined map search below is for Aboriginal Places and State Heritage Register items only. It does not include Interim Heritage Orders, State Agency Heritage Registers and Local Environmental Plans.

The location of Aboriginal Places and State Heritage Register items are marked on the map as a single approximation point for general identification and research purposes only.

Location information for some Aboriginal Places (e.g. burial grounds and sacred sites) have been generalised because of their cultural sensitivity. Location information for restricted Aboriginal Places is not shown at all. If an activity or development is proposed that may potentially impact on or harm (i.e., damage, deface or destroy) an Aboriginal Place, then proponents must undertake a search for the exact boundaries of Aboriginal Places through **AHIMS Web Services**.

Downloading of State Heritage Register spatial datasets and associated metadata into a Geographical Information System (GIS) software package is available through **Data NSW**

ATTACHMENT 8 – SECTION 149 (2) PLANNING CERTIFICATE

Locked Bag 2069, North Ryde NSW 1670
Facsimile 9952 8070
Telephone 9952 8222

City of Ryde

PLANNING CERTIFICATE UNDER SECTION 149 ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979

Cert No: PLN2017/1741
Date: Wednesday, 24 May 2017
Your Ref: 14 Tennyson Rd GLADESVILLE

Applicant: Mr Andrew Botfield (SNC Lavalin)
55 Clarence Street
Sydney NSW 2000

Property Address: 14 Tennyson Rd GLADESVILLE
Description: Lot 1 DP 549570

Property Reference: 527565
Land Reference: 30511

INFORMATION PROVIDED PURSUANT TO SECTION 149(2) OF THE ACT.

1. NAMES OF RELEVANT ENVIRONMENTAL PLANNING INSTRUMENTS, DRAFT INSTRUMENTS AND DEVELOPMENT CONTROL PLANS THAT APPLY TO THE CARRYING OUT OF DEVELOPMENT ON THE LAND

a) LOCAL ENVIRONMENTAL PLAN AND DEEMED ENVIRONMENTAL PLANNING INSTRUMENTS
Ryde Local Environmental Plan 2014

b) DRAFT LOCAL ENVIRONMENTAL PLANS
Nil

c) DEVELOPMENT CONTROL PLANS
City of Ryde Development Control Plan 2014

d) STATE ENVIRONMENTAL PLANNING POLICIES AND INSTRUMENTS (includes Draft Policies)
The Minister for Planning has notified Council that the following State Environmental Planning Policies and Deemed State Environmental Plans apply to the land and should be specified in this certificate:

State Environmental Planning Policies

State Environmental Planning Policy No 19 - Bushland in Urban Areas.
State Environmental Planning Policy No 21 - Caravan Parks.
State Environmental Planning Policy No 30 - Intensive Agriculture.
State Environmental Planning Policy No 33 - Hazardous and Offensive Development.
State Environmental Planning Policy No 50 - Canal Estate Development.
State Environmental Planning Policy No 55 - Remediation of Land.
State Environmental Planning Policy No 62 - Sustainable Aquaculture.
State Environmental Planning Policy No 64 - Advertising and Signage.
State Environmental Planning Policy No 65 - Design Quality of Residential Apartment Development.
State Environmental Planning Policy (Affordable Rental Housing) 2009
State Environmental Planning Policy (Building Sustainability Index: BASIX) 2004
State Environmental Planning Policy (Exempt and Complying Development Codes) 2008
State Environmental Planning Policy (Housing for Seniors or People with a Disability) 2004

State Environmental Planning Policy (Infrastructure) 2007
State Environmental Planning Policy (Major Development) 2005
State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007
State Environmental Planning Policy (State and Regional Development) 2011
State Environmental Planning Policy (Temporary Structures) 2007

Deemed State Environmental Planning Policies
Sydney Regional Environmental Plan (Sydney Harbour Catchment) 2005

Draft State Environmental Planning Policies
State Environmental Planning Policy No 66 - Integration of Land Use and Transport 2001
State Environmental Planning Policy (Competition) 2010
State Environmental Planning Policy (Educational Establishments and Child Care Facilities) 2017

Note: Specific constraints and zoning of the land may affect the applicability of certain provisions within the Policies listed above.

2. ZONING AND LAND USE UNDER RELEVANT LOCAL ENVIRONMENTAL PLANS

(a) ZONING and ZONING TABLE

Ryde Local Environmental Plan 2014 - Zone IN2 - Light Industrial

1 Objectives of zone

- To provide a wide range of light industrial, warehouse and related land uses.
- To encourage employment opportunities and to support the viability of centres.
- To minimise any adverse effect of industry on other land uses.
- To enable other land uses that provide facilities or services to meet the day to day needs of workers in the area.
- To support and protect industrial land for industrial uses.

2 Permitted without consent
Home occupations

3 Permitted with consent
Building identification signs; Business identification signs; Depots; Funeral Homes; Garden Centres; Hardware and building supplies; Industrial training facilities; Landscaping material supplies; Light industries; Neighbourhood shops; Places of Public Worship; Pubs; Recreation facilities (indoor); Roads; Warehouse or distribution centres; Wholesale supplies; Any other development not specified in item 2 or 4

4 Prohibited
Agriculture; Air transport facilities; Airstrips; Amusement centres; Biosolids treatment facilities; Boat building and repair facilities; Boat launching ramps; Boat sheds; Camping grounds; Caravan parks; Cemeteries; Charter and tourism boating facilities; Commercial premises; Correctional centres; Crematoria; Eco-tourist facilities; Educational establishments; Entertainment facilities; Environmental facilities; Exhibition homes; Exhibition villages; Extractive industries; Farm buildings; Forestry; Freight transport facilities; Function centres; Health services facilities; Heavy industrial storage establishments; Helipads; Highway service centres; Home-based child care; Home businesses; Home occupations (sex services); Industries; Information and education facilities; Jetties; Marinas; Mooring pens; Moorings; Open cut mining; Port facilities; Recreation facilities (major); Recreation facilities (outdoor); Registered clubs; Residential accommodation; Restricted premises; Rural industries; Sewage treatment plants; Signage; Tourist and visitor accommodation; Water recreation structures; Water supply systems.

(b) DEVELOPMENT STANDARDS FOR THE ERECTION OF A DWELLING HOUSE
No development standards under the Local Environmental Plan apply to the land that fix minimum land dimensions for the erection of a dwelling house on the land.

(c) CRITICAL HABITAT
No. The land does not include or comprise critical habitat under the Local Environmental Plan.

(d) CONSERVATION AREA (however described)
No. The land has not been identified as being within a heritage conservation area under the Local Environmental Plan.

(e) ITEMS OF ENVIRONMENTAL HERITAGE (however described)
No. An item of environmental heritage is not situated on the land under the Local Environmental Plan.

2A. ZONING AND LAND USE UNDER STATE ENVIRONMENTAL PLANNING POLICY (SYDNEY REGION GROWTH CENTRES) 2006

This land **is not** subject to:

(a) Part 3 of the *State Environmental Planning Policy (Sydney Region Growth Centres) 2006* (the 2006 SEPP); or
(b) a Precinct Plan (within the meaning of the 2006 SEPP); or
(c) a proposed Precinct Plan (within the meaning of the 2006 SEPP) that is or has been the subject of community consultation or on public exhibition.

OTHER PRESCRIBED INFORMATION

3. COMPLYING DEVELOPMENT
Whether or not the land is land on which complying development may be carried out under each of the codes for complying development in *State Environmental Planning Policy (Exempt and Complying Development Codes) 2008.* If complying development may not be carried out on that land because of one of the requirements under that Policy, the reason why it may not be carried out.

General Housing Code and Rural Housing Code
Complying Development under the General Housing Code and Rural Housing Code may be carried out on this land.

Housing Alterations Code and General Development Code
Complying Development under the Housing Alterations Code and General Development Code may be carried out on the land.

Commercial and Industrial (New Buildings and Additions) Code
Complying development under the Commercial and Industrial (New Buildings and Additions) Code may be carried out on the land.

Subdivisions Code, Commercial and Industrial Alterations Code, Demolition Code and Fire Safety Code
Complying development under the Subdivisions Code, Commercial and Industrial Alterations Code, Demolition Code, and Fire Safety Code may be carried out on the land.

Note : *It is necessary for the zoning, size of land and other criteria such as risk level of flood prone land and bushfire prone land to be in accordance with that specified in State Environmental Planning Policy (Exempt and Complying Development Codes) 2008 for certain types of development to occur under the Policy.*

4. COASTAL PROTECTION
Whether or not the land is affected by the operation of section 38 or 39 of the *Coastal Protection Act 1979*, but only to the extent that the council has been so notified by the Department of Services, Technology and Administration.

The land is not affected by the operation of section 38 or 39 of the Coastal Protection Act 1979.

4A Information relating to a coastal council
(1) Whether an order has been made under Part 4D of the *Coastal Protection Act 1979* in relation to temporary coastal protection works (within the meaning of that Act) on the land (or on public land adjacent to that land), except where the council is satisfied that such an order has been fully complied with.

NO

(2)(a) Whether the council has been notified under section 55X of the *Coastal Protection Act 1979* that temporary coastal protection works (within the meaning of that Act) have been placed on the land (or on public land adjacent to that land), and
(b) If works have been so placed—whether the council is satisfied that the works have been removed and the land restored in accordance with that Act.

NO notification received

4B Annual charges under Local Government Act 1993 for coastal protection services that relate to existing coastal protection works
Whether the owner (or any previous owner) of the land has consented in writing to the land being subject to annual charges under section 496B of the *Local Government Act 1993* for coastal protection services that relate to existing coastal protection works (within the meaning of section 553B of that Act).

NO

Note. "Existing coastal protection works" are works to reduce the impact of coastal hazards on land (such as seawalls, revetments, groynes and beach nourishment) that existed before the commencement of Section 553B of the *Local Government Act 1993.*

5. MINE SUBSIDENCE
Whether or not the land is proclaimed to be a mine subsidence district within the meaning of section 15 of the *Mine Subsidence Compensation Act 1961*.

No. The land has not been proclaimed to be a mine subsidence district.

6. ROAD WIDENING AND ROAD REALIGNMENT
Whether or not the land is affected by any road widening or road realignment.

The land is not affected by any road widening or road realignment under:
(a) Division 2 of Part 3 of the Roads Act 1993;
(b) any Environmental Planning Instrument.
(c) any resolution of Council.

7. COUNCIL AND OTHER PUBLIC AUTHORITY POLICIES ON HAZARD RISK RESTRICTIONS
Whether or not the land is affected by a policy adopted by the council, or adopted by any other public authority and notified to the council for the express purpose of its adoption by that authority being referred to in planning certificates issued by council, that restricts the development of the land because of the likelihood of:

(i) landslip — NO.
(ii) bush fire — NO.
(iii) tidal inundation — NO.
(iv) subsidence — NO.
(v) acid sulphate soil — YES
(vi) any other risk (other than flooding) — NO.

Note: *The fact that land has not been identified as being affected by a policy to restrict development because of the risks referred to does not mean that the risk is non-existent.*

7A. FLOOD RELATED DEVELOPMENT CONTROLS INFORMATION

(1) Whether or not development on that land or part of the land for the purposes of dwelling houses, dual occupancies, multi dwelling housing or residential flat buildings (not including development for the purposes of group homes or seniors) living is subject to flood related development controls - YES

(2) Whether or not development on that land or part of the land for any other purpose is subject to flood related development controls - YES

(3) Words and expressions in this clause have the same meanings as in the instrument set out in the schedule to the Standard Instrument (Local Environmental Plans) Order 2006.

8. LAND RESERVED FOR ACQUISITION

Whether or not any environmental planning instrument or proposed environmental planning instrument referred to in Clause 1 makes provision in relation to the acquisition of the land by a public authority, as referred to in section 27 of the Act.

No Environmental Planning Instrument applying to the land provides for the acquisition of the land by a public authority pursuant to Section 27 of the Act.

9. CONTRIBUTIONS PLANS

The name of each contributions plan applying to the land:

City of Ryde Section 94 Development Contributions Plan 2007 – Interim Update (2014)

9A BIODIVERSITY CERTIFIED LAND

This land is not biodiversity certified land within the meaning of Part 7AA of the Threatened Species Conservation Act 1995.

10 BIOBANKING AGREEMENTS

The land is not the subject of a biobanking agreement under Part 7A of the Threatened Species Conservation Act 1995.

11. BUSH FIRE PRONE LAND

The land described in this certificate is not bush fire prone land (as defined in the Act).

12. PROPERTY VEGETATION PLANS

The land is not subject to a property vegetation plan under the Native Vegetation Act 2003.

13. ORDERS UNDER TREES (DISPUTES BETWEEN NEIGHBOURS) ACT 2006

There has not been an order made under the Trees (Disputes between Neighbours) Act 2006 to carry out work in relation to a tree on the land.

14. DIRECTIONS UNDER PART 3A

There is no direction in force under section 75P (2)(c1) of the Environmental Planning and Assessment Act 1979.

15. SITE COMPATIBILITY CERTIFICATES AND CONDITIONS FOR SENIORS HOUSING

Part A: There has been no Site Compatibility Certificate issued (of which Council is aware) under Clause 25 of State Environmental Planning Policy (Housing for Seniors or People with a Disability) 2004.

Part B: There has not been any development consent granted since 11 October 2007 for development to which State Environmental Planning Policy (Housing for Seniors or People with a Disability) 2004 applies.

16. SITE COMPATIBILITY CERTIFICATES FOR INFRASTRUCTURE

There is no valid Site Compatibility Certificate (Infrastructure) of which the Council is aware in respect of proposed development on the land.

17. SITE COMPATIBILITY CERTIFICATES AND CONDITIONS FOR AFFORDABLE RENTAL HOUSING

There is no current Site Compatibility Certificate (Affordable Rental Housing) that Council is aware in respect of proposed development on the land.

There are no terms of a kind referred to in clause 17(1) or 37(1) of State Environmental Planning Policy (Affordable Rental Housing) 2009 that have been imposed as a condition of consent to a development application in respect of the land.

18. PAPER SUBDIVISION INFORMATION

(1) The name of any development plan adopted by a relevant authority that applies to the land or that is proposed to be subject to a consent ballot. NIL

(2) The date of any subdivision order that applies to the land. NIL

(3) Words and expressions used in this clause have the same meaning as they have in Part 16C of this Regulation.

Note: *City of Ryde does not hold any paper subdivision within the meaning of this clause.*

19. SITE VERIFICATION CERTIFICATES

There is no current site verification certificate of which the Council is aware in respect of the land.

Note. *The following matters are prescribed by section 59 (2) of the Contaminated Land Management Act 1997 as additional matters to be specified in a planning certificate*:

(a)The land to which this certificate relates IS NOT significantly contaminated land.

(b)The land to which this certificate relates IS NOT subject to a management order.

(c)The land to which this certificate relates IS NOT the subject of an approved voluntary management proposal.

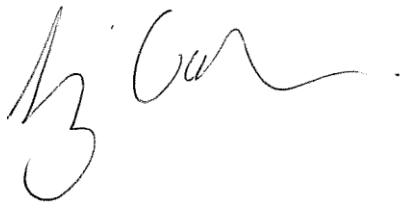
(d)The land to which this certificate relates IS NOT subject to an ongoing maintenance order .

(e)The land to which this certificate relates IS NOT subject to a site audit statement.

Note. *(i) Pursuant to Section 149(5) of the Environmental Planning and Assessment Act 1979, the City of Ryde may provide advice on additional matters affecting the land of which it may be aware. You are advised that information on either heritage, endangered or adequately conserved bushland, draft Development Control Plans, Master Plans or other relevant matters, applies to the land and is available on the s149(5) Certificate for the land*.

(ii) s149(5) Certificates under the Environmental Planning and Assessment Act 1979, contain all the information under s149(2) and as such, an application and fee for a combined s149 certificate must be applied for.

***Note**: The information in this certificate is current as of the date of the certificate.*



Liz Coad
Acting Director City Planning and Development

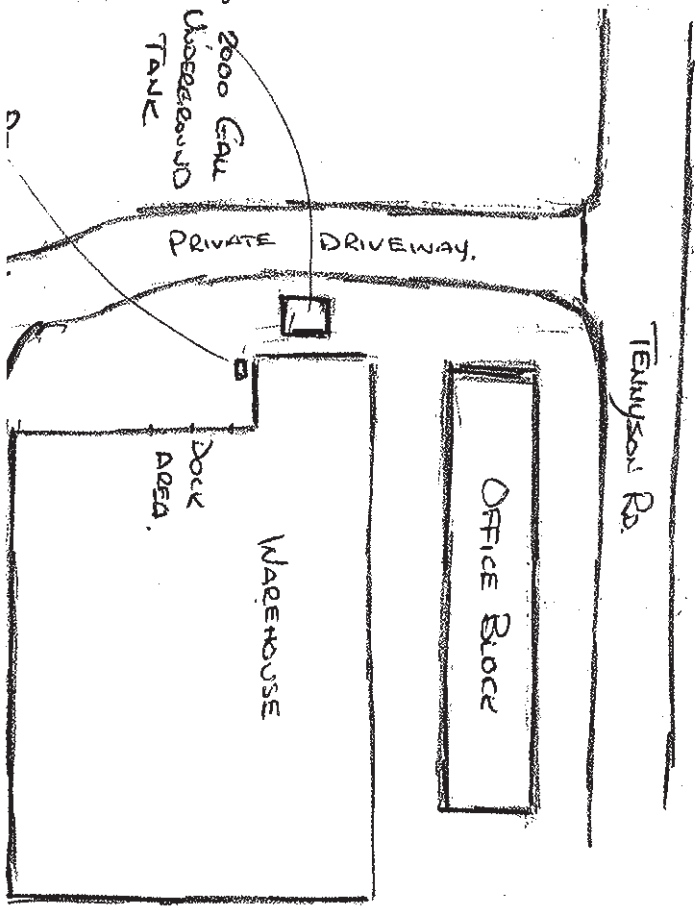
Make Rough Sketches showing:

Ground plans of premises showing position of depot or depots and adjacent buildings, also distances separating depots and buildings.



Sketch of depot or depots showing provision made for ventilation, also inside dimensions (length, width, and depth) of the pit or lower portion, designed to prevent outflow.

EXPLANATORY

Inflammable Liquid –

Mineral Oil - includes kerosene, mineral turpentine and white spirit (for cleaning), and compositions containing same.
Mineral Spirit - includes petrol, benzene, benzolene, benzol and naphtha, and compositions containing some.

Dangerous Goods -

Class 1 - acetal, acetaldehyde, acetone, acrolein, amyl mercaptan, butyl acetate, butyl mercaptan, butyl propionate, crotonaldehyde, dichloro-ethylene, diethylketone, dioxane, diethylamine, dimethyl hydrozine, dipropylamine, divinyl ether, dipropyl ether, ethyl acetate, ethyl acrylate, ethyl chloride, ethyl ether, dichloroethane (ethylene dichloride), ethyl mercaptan, ethyl methacrylate, ethyl methyl ether, ethyl propyl ether, ethyl propionate, methyl propyl ketone, methyl acetate, methyl acrylate, methylal, methyl ethyl ether, methyl ethyl ketone, methyl methacrylate, methyl vinyl ketone, methyl vinyl acetate, piperidine, propanal, propyl acetate, propylamine, propylene oxide, pyridine, tetrahydrofuran, thiophene, triethylamine, valeraldehyde, vinyl acetate, vinyl allyl ether, vinyl butyl ether, vinyl butyrate, vinyl cyanide (acrylonitrile), vinylidene chloride, vinyl ethyl ether, vinyl propyl ether, vinyl propionate, any combination of substances of an inflammable character suitable for use as an industrial solvent and having a true flashing point of less than 73 degrees Fahrenheit, manufactured products, containing organic solvents, having a true flashing point of less than 73 degrees Fahrenheit.

Class 2 - acetic acid, acetyl acetone, acetic anhydride, allyl alcohol, amyl acetate, amyl alcohol, butyl alcohol, butyl methacrylate, chlorobenzene, cyclohexanone, dibutyl ether, dibutyl ketone, dipentene, epichlorohydrin, ethanol (ethyl alcohol), ethyl benzene, ethylene diamine, furfural, mesityl oxide, methyl alcohol, methyl amyl ketone, methyl butyl ketone, pine oil (having a flashing point below 150°F), propyl benzene, propanol, vegetable turpentine, vinyl benzene, (styrene
