

Another City of Ryde project

For an active and healthy city

Park Tree Planting Program Gannan Park, Ryde

Dear Resident

We would like to inform you of the Park Tree Planting Program at Ryde.

Council has been granted additional funding for the planting of trees throughout Ryde by the Department of Industry & Environment "5 Million Trees for Greater Sydney Program".

This programme will enhance and increase the sustainability of City of Ryde's urban canopy cover.

Gannan Park has been selected for the opportunity to increase vital canopy cover. The expansion of the local canopy cover will improve and expand the connectivity between local bushland areas and enhance local biodiversity. The tree species selected for this year's park tree planting program are all endemic (local native) species.

Commencement

May 2020.

Completion

Anticipated to be completed by June 2020, weather permitting.

Council thanks you for your patience.
