ITEM (I) CHARLES STREET, RYDE

RTC COMMENTS:

TfNSW has no objections to the proposal, subject to detailed design assessment.

TfNSW has concerns with providing pedestrian fencing directly on the road carriageway. It has increased chance of being hit by car and then harming pedestrians. It is recommended that a raised median/island be proposed with pram ramps up and the fencing installed on this island. The width of the traffic islands

MINUTES

should be 2m as per standard refuge island design, however it should be ensured that wheelchairs are able to fit in the staggered arrangement. If fencing on the raised island is not a feasible option, then TfNSW will not object to them in the road pavement, however they highlight their concerns.
