HOW TO READ THIS QUARTERLY REVIEW REPORT

The Quarterly review report contains 4 sections

1. The General Manager's Overview

This section provides an Executive Summary with key highlights for the quarter and an assessment of our Financial Position, as at the end of the quarter.

2. Our Outcomes

The City of Ryde is working towards delivering seven strategic Outcomes identified in our Community Strategic Plan. This report provides an update on the programs and projects that have been identified in our Operational Plan contributing to each of the Outcomes.

Our projects are specific activities which are to be delivered over a set period of time to meet our Community's vision. These are supported by Council's base budget, which forms part of our operating costs, including our people and our maintenance and other contracts, to deliver all our council services.

Being introduced this year to the outcome sections of the Quarterly Review Report are Community Indicators. Local community wellbeing indicators (or 'community indicators') have been developed in Australia and around the world as a way to track trends in quality of life for a given community and as a basis for improving community engagement,

community planning and policy making. They are based on the approach that ways of understanding whether life is getting better should go beyond traditional economic measures (City of Ryde, 2012).

Community indicator frameworks acknowledge the interrelationship between social-cultural, ecological and economic conditions providing a 'triple bottom line' sustainability analysis. The quadruple bottom-line extends this concept to include governance outcomes. Indeed, most community indicator initiatives, including the City of Ryde's Community indicators, measure elements of each of these dimensions in order to provide a comprehensive picture of the wellbeing of communities (City of Ryde, 2012).

The City of Ryde recognises it has a major responsibility to deliver programs and services that contribute to our community wellbeing, however the idea of community indicators is that they measure issues of relevance to the community regardless of whether councils has direct responsibility for them. Not all of the community indicators listed throughout this report are within council's direct control; some relate to areas where council has influence, through lobbying, education and collaboration with other agencies; others are areas of concern for council that are monitored to increase awareness and understanding of issues important to the community.

Adapted from the 'Community Strategic Planning Indicators Resource', Division of Local Government (DLG) of the NSW Department of Premier and Cabinet, 2011.

It should be noted that Community Indicators are not the same as organisational performance indicators. Performance Indicators are specific to an organisation and measure the performance of that organisation (or a part of it) against an organisational plan, or against the organisation's legislative responsibilities. In this report these performance indicators can be found in the program section.

HOW TO READ THIS QUARTERLY REVIEW REPORT CONTINUED...

3. Our Corporate Performance Indicators

In addition to our project performance, we have identified a set of Corporate Performance Indicators to report on our delivery of service to our customers and partners, track project management of our projects, monitor our budgets and financial management and indicate our organisations progress in improving our culture through learning and development. Where quarterly performance progress results are available for these measures, they will be provided in this section along with any commentary explaining variances from target or actions required.

4. Our Programs

All of the City's projects and activities are focused around delivering on 21 programs. Detail on our progress against program budgets and projects along with the specific performance indicators identified to monitor each program are provided in this section.

GENERAL MANAGER'S OVERVIEW

Quarterly Overview

As a result of the September Quarterly Review, Council has achieved a net improvement in the 2012/2013 Operational Budget of \$0.11 million. This is a pleasing result and has been achieved by tight controls of Council's operating costs with net savings of employee costs (\$0.07 million) and additional rate income of \$0.19 million brought to account in this review.

However, due to the continuing growing pressure on Council's infrastructure maintenance budget and the shortfall in funding the renewal of Council's existing infrastructure, this review is proposing to transfer an additional \$0.40 million to the Asset Replacement Reserve. This is being proposed to be funded from both the surplus generated from this review (\$0.11 million) and \$0.29 million from Council's current Working Capital surplus of \$3.71 million. If supported by Council, Working Capital will be reduced to a forecasted \$3.42 million, above Council's minimum balance of \$3.00 million.

The following summary below is provided on the key components of Council's One Year Operational Plan for 2012/2013 and is supported by detailed information in the appendices.

Financial Position

Working Capital Position

As explained above, as a result of the September quarterly review, Council's Working Capital would have increased by \$0.11 million to \$3.82 million. However, to assist Council in responding to further anticipated pressures on its infrastructure, an additional transfer of \$0.40 million to the Asset Replacement Reserve is proposed in this review, that will result in Working Capital being projected to be \$3.42 million as at 30 June 2013.

Base Budget

Income is projected to reduce by \$0.77 million to \$88.32 million, while Base Budget Expenses are projected to increase by \$0.80 million to \$76.43 million, giving a net projected increase in the Base Budget Deficit of \$1.57 million (11.65%).

Non-Capital Budget

Income is projected to decrease by \$0.02 million to \$0.20 million, while Non-Capital Expenses are projected to increase by \$0.21 million to \$4.43 million, giving a net projected increase in net Non-Capital Expenditure of \$0.23 million (5.80%).

Capital Budget

Income is projected to increase by \$3.18 million to \$6.53 million, while Capital Expenses are projected to increase by \$1.53 million to \$34.60 million, giving a net projected reduction in net Capital Expenditure of \$1.64 million (5.53%).

Progress Against Indicators

Our performance indicators help to provide a snap shot of the organisations health. Corporate indicators focus on major areas across the whole organisation and program indicators track how we are delivering on specific elements within each of the 21 programs outlined in our 2012-2016 Delivery Plan including One year Operational Plan 2012-2013.

Corporate Indicators

As identified in pages 40-41, the majority of corporate indicators are on track.

Of particular note the following areas demonstrate improvements in Council's performance against previous trends or targets:-

- We have continued to maintain our high customer service standards in responding to our customer requests with 89% of all requests responded to within the agreed timeframe of ten days against our target of 90%. I am pleased to see the continuation of our high performance in this area, we have consistently been on target or within 1% of the target for the past year.
- In the first quarter there has been continued improvement in the handling of complaints, with 96% of tier 1 and 2 complaints responded to within the agreed number of working days. This indicator showed improvements over the past year and has been maintained between 95-100% for the last two quarters.
- The sound management of our Budget over the past year has continued into the first quarter this year. This indicator has consistently been on track for the past five quarters.
- Our lost time injuries (LTI's) are the lowest in three years for this quarter (100 lost time days). This is also a reduction of five days from quarter four last year.

Those corporate indicators which have not met target this quarter and where we will look for an improvement on next quarter are:-

- 80% of inward correspondence was completed within 10 working days against our target of 90%.
- 72% of project milestones completed on time within the quarter against our target of 90%.
- 93% of internal audit recommendations were implemented on time against our target of 100%.

Program Indicators

Of all 43 indicators across our 21 program areas, we achieved 32 (74%) of our performance indicators in our programs in quarter one.

Of particular note the following areas of performance improved against previous trends or targets:-

- The RALC recorded 164,467 visitors this quarter which is a 14.6% increase from the same quarter last year.

- We continue to see improvements in our mean gross DA determination times against the group three average. We have improved 15 days from last quarter, this is the result of both seasonal trends and the success of our Express DA service. So far 80 applications (approximately 58%) have been processed as Express Applications and all were determined within 30 days.
- The Top Ryder Bus service continues to show increase patronage with 2,100 more passengers than the quarter one last year.

John Neish
General Manager

FINANCIAL MANAGEMENT

Overview

Following the first quarter budget review, Council's financial position, year to date (YTD), is within 796.14% of the budget (excluding reserve movements).

The Capital Works Program, YTD, is at approximately 19.17% net financially, excluding contributed assets.

Operating expenses, YTD, are within 20.04% (favourable) of the budgeted amounts, which is a good result.

Operating Income (Base Budget and Non-Capital & Capital Income) is projected to increase by \$2.39 million (2.58%) and Operating Expenses are projected to increase by \$1.01 million (1.27%), a net increase in Operating Surplus of \$1.38 million to \$14.20 million. This is a good result given the tight revenue base from which we are operating.

Available Working Capital is projected to reduce by \$0.29 million to approximately \$3.42 million. This is due to a transfer of \$0.40 million to the Asset Replacement Reserve.

Council had budgeted to undertake \$33.07 million of capital works. This is projected to increase by another \$1.53 million, the bulk of which will be funded by either new grants or transfers from reserves. This will give a total capital works budget of \$34.60 million.

Leadership** |

CITY OF LIVEABLE NEIGHBOURHOODS

A range of well-planned clean and safe neighbourhoods, and public spaces, designed with a strong sense of identity and place.

Our outcome of Liveable Neighbourhoods will create places that are designed for the enjoyment of our residents so that they are able to experience the lifestyle and opportunities that Ryde has to offer close to their homes.

GOAL ONE

All residents enjoy living in clean, safe, friendly and vibrant neighbourhoods.

GOAL TWO

Our community has a strong sense of identity in their neighbourhoods and are actively engaged in shaping them.

GOAL THREE

Our neighbourhoods thrive and grow through sustainable design, planning and regulation that support community needs.

Community Indicators

The following Community Indicators have been selected for this outcome area. Council will be monitoring these indicators and over the coming quarters, and baseline data will be reported.

Crime

The rate of crime, especially violent crime such as assault and robbery, can impact on the sense of safety in a community. By studying the comparative rates of crimes, we can see where crime problems exist in a community and develop programs and plans for addressing these problems, and any underlying issues.

Housing Mix

This indicator considers the resources and characteristics of dwellings, and their linkage to the profile of residents in an area (NSW Department of Housing, 2010). In addition, the extent to which housing meets the needs of residents is an important part of the quality of life of occupants and developing social relationships and personal identity (ABS, 2001).

Housing Affordability

Housing becomes unaffordable when dwelling prices are too high, when incomes fall too low, or some combination of both. Housing affordability can be a good indicator to overall and individual economic conditions and to the way society includes or excludes low-income earners in some areas. Accordingly, high levels of housing affordability are often found in more expensive areas: where residents tend to have comparatively high levels of income, especially in comparison with suburbs that contain cheaper housing alternatives.

Financial Position

Base Budget

A rise in the State Debt Recovery Office's processing fees has seen an increase in Regulatory expenditure, and a budget revision has been sought to reflect this. It has been somewhat offset by The Macquarie Park Parking Scheme, which has generated more revenue than expected. Parking revenue in general is tracking well, and a strong quarter in the development sector has also seen healthy Development Assessment and Building Enforcement income figures.

Non-Capital Budget

Expenditure on non-capital projects is currently below budget as the Illegal Dumping Surveillance Program was cancelled this quarter. The first two Community Education & Information Seminars were held this quarter and were delivered under-budget.

Capital Budget

Expenditure on capital projects has been minimal to date as construction works are scheduled for later in the year.

Progress Against Projects

Design works for the Neighbourhood Centre Renewal project have been completed and the first stage of construction will commence in Quarter 2.

The first two Community Education & Information Seminars were held this quarter with a presentation to Macquarie University Postgraduate students on Development Assessment followed by a tour of the city, illustrating the practical implications of Council's Land-Use Plans and Development Controls. The second seminar was delivered to local small business owners, following the theme of Small Business September, the seminar provided information on planning regulations and the development process for the set-up of Home-Businesses.

Vince Galletto - Team Leader - Building & Development Advisory Service with students from Macquarie University

CITY OF WELLBEING

A healthy community, with all supported throughout their life by services, facilities and people.

Our outcome of a City of Wellbeing will ensure that we create a city that supports the physical and emotional health of all of our community.

GOAL ONE

Our residents are encouraged and supported to live healthy and active lives.

GOAL TWO

All residents feel supported and cared for in their community through the provision of ample services and facilities.

GOAL THREE

Residents feel secure and included in an environment where they can connect socially and are supported by their neighbours.

Community Indicators

The following Community Indicators have been selected for this outcome area. Council will be monitoring these indicators and over the coming quarters, and baseline data will be reported.

Self-Reported Health

Self-reported health is a useful measure of wellbeing that reflects physical health problems as well as health behaviours and mental health problems. While self-assessment may not be as reliable as one measured by a health professional, it does provide useful information on the perceptions of an individual, and has been shown to be a predictor of mortality and morbidity (Population Health Division 2008).

Healthy Lifestyle Choices

Some behaviour is strongly associated with poorer health outcomes and can dramatically increase an individual's risk of personal harm or death and can also decrease quality of life. Smoking and risky alcohol consumption can lead to poor short-term and long-term health outcomes and to premature death. Obesity and poor nutrition are increasing national and international trends, which have been labelled an epidemic. Risk taking behaviour is also correlated to other indicators of social disadvantage, such as poverty and unemployment.

Mortality Rates

Burden of disease refers to the health burden that diseases, injuries and risk factors place on populations, which is ultimately reflected in mortality rates. This indicator examines both of these areas in detail.

Financial Position

In Councils fixed operations this outcome has a 36.72% positive result with income exceeding budget by 12.89% for this year so far. This strong result with increased attendance at the Ryde Aquatic Leisure Centre and the receipt of additional grant funds in community and culture.

The project budget in this outcome is currently underspent reflecting the scheduled commencement of some projects later in the year.

Overall the outcome is unspent by 13.03% year to date.

All Projects are on track.

Progress Against Projects

Skate clinic held in Meadowbank Park

This quarter has seen some great work on projects for the year with all projects on track. Our highlights this quarter include: Free Wi-Fi made available at Eastwood Library for the first time as well as substantial upgrades to the Wi-Fi at West Ryde, North Ryde and Gladesville Libraries. Visitors embraced the service at these locations with 14,429 log ins recorded during the first quarter. Popularity is continuing to grow as people find out about the service with almost double the number of people accessing Wi-Fi in September compared to July.

The libraries became a place to have fun, meet new friends and learn new skills during the July and September school holidays. In July children dressed up in traditional dress for the 'It's a small world' costume party, learnt how to make sushi, Japanese kites and also watched a performance by the Ryde Youth Theatre. In total, 17 events were held with 460 children and young adults attending.

The September/October school holiday program activities were well attended and included craft sessions and a pyjama story time. The young adults had fun cooking at the chocolate workshops and learnt the art of chocolate tasting. Dungeons and Dragons and song writing workshops were also popular amongst the older children.

The Ryde Aquatic and Leisure Centre has experienced its highest attendance numbers since 2008/2009, thanks primarily to improved weather conditions.

Skate Clinics were held in Meadowbank Park during the July School holidays with 30 young people in attendance. The clinic catered for beginners and advanced level.

As part of the City of Ryde's Crime Prevention Plan, during August and September, representatives from both Local Area Commands held community awareness and safety talks at West Ryde library. The senior's session attracted seven local community members. The children's story-time session about child road safety was attended by over 20 children with their parents or primary carers also paying close attention. The story was followed by more fun colouring in resources provided by NSW Police, as well as a photo opportunity with Senior Constable Chrystal.

Following the public exhibition, the Integrated Open Space Plan was adopted by Council. This Plan provides the City with a clear direction for all future planning and management of the City's 351 hectares of open space and parklands. The implementation of the Integrated Open Space Plan is underway with the commencement of the Children's Play Implementation Plan and Open Space Future Provision Plan.

With a new commitment to proactive tree management across the City, the Urban Forest Policy and revised Development Control Plan Part 9.6. - Tree Preservation were adopted by Council. These documents combine to conserve and enhance the City's Urban Forest by promoting tree protection and tree planting. The next steps towards Council's commitment to enhancing the Urban Forest is the public exhibition of the Urban Forest Plan and Street Tree Master Plan planned for end of 2012.

Photo opportunity with NSW Police Senior Constable Chrystal.

CITY OF PROSPERITY

Creating urban centres which champion business, innovation and technology to stimulate economic growth and local jobs.

Our outcome of a City of Prosperity will ensure that our major business centres have a competitive edge in relevant global, national and metropolitan markets, support economic growth and provide opportunities for those that live, study and work here.

GOAL ONE

Our Community and businesses across the city flourish and prosper in an environment of innovation progression and economic growth.

GOAL TWO

Our city is well-designed and planned to encourage new investment, local jobs and business opportunities.

GOAL THREE

Macquarie Park is recognised globally and locally as an innovative education and technology hub.

Community Indicators

The following Community Indicators have been selected for this outcome area. Council will be monitoring these indicators and over the coming quarters, and baseline data will be reported.

Average Income

Income plays an important part in shaping life opportunities. Levels of income, and the incidence of low incomes, can be used to indicate social health, improve an individual's participation and personal quality of life, including their ability to access basic needs and also recreation and discretionary expenses. This indicator includes only wage and salary earners.

Local Employment and Employing Businesses

Employment is important for building social networks and feeling part of a local space or community. When people work locally, they are more inclined to contribute to the social life of the community and retail spending is retained. Local employment is also desirable as it minimises the personal and environmental costs of travel. This ratio is calculated as the number of local jobs compared to local workers.

Unemployment

Obtaining gainful employment for those seeking it is an important part of personal well-being and contribution to the economy. Unemployment is a very commonly used indicator of the health of a society, as it is associated with several negative social outcomes, including low economic resources and skill loss; as well as susceptibility to loss of self esteem, illness and mental stress. A failure for an individual to find employment also implies that an economic region is not fully utilising all available resources.

Financial Position

Base Budget and Non-Capital Budget

Base and Non-Capital expenditure is well below budget for this quarter as a number of activities and projects are yet to commence. It is expected that expenditure will continue to track below budget into the second half of the year.

Capital Budget

Similarly, Capital expenditure is below budget, with construction costs scheduled to increase in the second half of the year. The footpath upgrade on Waterloo Road was delivered under budget with surplus funds returned to reserves.

Progress Against Projects

The Town Centres Wayfinding Plan has been deferred to ensure adequate resources are available to complete existing projects and base budget activities, including on-going work upgrading our Town Centres and on the Draft Local Environment Plan.

An Interim Transport Management Association Board has been established, and the first meeting was held in August. The board consists of representatives from: The City of Ryde, Transport for NSW, Optus, BOC, Macquarie University, Goodman, AMP Capital, and Medtronic.

Small Business September was a hit once again this year, with all events booking out well in advance. The Ryde Business Boot camp provided an all-round course over four intensive three-hour sessions covering Marketing and Websites, Business Planning, Business Law and Insurance, and Accounting. The Boot camp was run by Karen Wakefield, who teaches Small Business Management at the Northern Sydney Institute of TAFE and lectures in Law and Economics at Charles Stuart University. In the Marketing Yourself Online workshop, Director of Cyrius Media Group

Stefan Sojka provided attendees with valuable insights into how to get the most out of search engines, social media, their websites, and the digital world in general. Finally, Suzy Jacobs, the Director of She Business, shared her diverse experience, from providing sales training for IBM and Compaq to running her own furniture manufacturing business, with a particular focus on how best to network to create new business opportunities. These events were all free to attend and a survey of Boot campers revealed that 70% found it helpful in setting up their business and 100% would recommend the course to others.

In addition, this quarter saw the number of Businesses registered for our Online Business Directory increase from approximately 70 to 170, a solid result given the register has only been operational since July.

CITY OF ENVIRONMENTAL SENSITIVITY

Working together as a community to protect and enhance our natural and built environments for the future.

Our outcome of Environmental Sensitivity will ensure that a balance is maintained between the pressures from population growth, and the protection and enhancement of our natural ecosystems. It will reduce our exposure to the risks of climate change.

GOAL ONE

Our residents, businesses and visitors collaborate in the protection and enhancement of our natural environment.

GOAL TWO

To encourage and enable all our residents to live a more environmentally sensitive life.

GOAL THREE

As we grow, we protect and enhance the natural and built environments for future enjoyment and manage any impacts of climate change.

Community Indicators

The following Community Indicators have been selected for this outcome area. Council will be monitoring these indicators and over the coming quarters, and baseline data will be reported.

Biodiversity

Biological diversity is extremely hard to quantify, and available indicators are considered inadequate, especially on a small scale. The number of threatened species is the best available proxy for the loss of species (Environment Protection and Heritage Council 2003).

Waste and Recycling

Waste is an indicator of the volume of resources being consumed in a community, as well as inefficiencies in resource use. Recycling diverts materials from landfill, saves space and minimises input resources in production. This indicator provides a useful indicator of community commitment to sustainable practices (Community Indicators Victoria 2009).

Energy Use and Carbon Emissions

Energy is fundamental to the operation of modern urban environments, by supporting the production and provision of goods and services, as well as for transport and household comfort. Using less energy is generally more environmentally beneficial due to the wastes generated during energy production and use, and because of the discernable impact of greenhouse gas concentration related to energy uses. This indicator considers the local efforts to reduce energy consumption and carbon emissions (Australian and New Zealand Environment and Conservation Council 2000) (Environment Protection and Heritage Council 2003).

Financial Position

The Outcome had a September Quarter end 2012/2013 actual base budget expenditure result of \$2.411 million against an year to date budget of \$4.148 million. \$1.1 million of this year to date variance is attributable to invoices not received from the waste contractor.

Operating income year to date is \$14.462 million on a full year budget of \$16.653 million, exceeding target mainly due to the impact of Domestic Waste Management Income with a favourable variance of \$808,000.

Non-Capital projects within the Outcome have an annual budget of \$395,000 and are on track year to date.

Capital expenditure for the quarter end was \$983,000 against an adjusted year to date budget of \$1.864 million (excluding Surf Attraction Equipment). The variance relates to the installation of the Cogeneration Plant (\$817,000) with majority of their expenditure scheduled for quarters later in the year, and the timely receipt of grant monies in the Capital income budget.

CITY OF CONNECTIONS

Access and connection to, from and within the City of Ryde. Providing safe, reliable and affordable public and private travel, transport and communication infrastructure.

Our outcome of a City of Connections will create a city where people feel connected locally and globally, and can easily gain access to their work place, recreation opportunities, facilities and services in both a physical and virtual way.

GOAL ONE

Our residents, visitors and workers are able to easily and safely travel on public transport to, from and within the City of Ryde.

GOAL TWO

Our community has the option to safely and conveniently drive, park, cycle or walk around their city.

GOAL THREE

Our residents, visitors, workers and businesses are able to communicate locally and globally.

Community Indicators

The following Community Indicators have been selected for this outcome area. Council will be monitoring these indicators and over the coming quarters, and baseline data will be reported.

Transport Options

Connectivity includes understanding the transport options available in Ryde. Transport is seen as a key indicator of community and individual wellbeing, as it provides a means of greater access to services, work and social, cultural and recreational activities, and it helps to maintain connections and networks. Reliable, safe, fast and frequent transport is important as it helps maximise the time an individual can spend on activities and with family and friends.

Private Motor Vehicles

Private motor vehicles were the most commonly used method of transport in Ryde, and the reliability and ease of this mode of transport is an important part of connectivity for Ryde. This indicator looks at the number of vehicles as well as overall levels of congestion and usage.

Internet Access

Connectivity includes effective and accessible communication infrastructure. Internet access is an increasingly common way of connecting with information and services and also for social participation. Access to the internet can also be seen as an enabler of better wellbeing, through increased access to a variety of services, social opportunities, education and information. There is evidence, however, that a digital divide is developing that excludes some of our most vulnerable individuals who could benefit considerably from access (McLaren & Zappala 2002).

Financial Position

The City of Connections finished the September 2012 Quarter with Base Budget actual expenditure of \$2.2 million, on an year to date budget of \$1.74 million. The variance is attributable to the restorations area (\$335,000) which is offset by additional income.

Overall income to date of \$1.653 million for the Outcome exceeding target year to date by around \$942,000.

The Outcome also has four Non-Capital projects to the value of \$383,000 which are currently within budget year to date.

Capital expenditure for the Outcome had an actual result of \$2.01 million against an year to date budget of \$2.780 million, with projects underspent to date including Transport Parking Technology (deferred by Council).

Capital Income in the form of Section 94 capital contributions to Roads had an actual result of \$2.033 million year to date, which has resulted on a favourable variance and will need budget added to reflect.

CITY OF HARMONY AND CULTURE

A welcoming and diverse community, celebrating our similarities and differences, in a vibrant city of culture and learning.

Our outcome of a City of Harmony and Culture will ensure that the City of Ryde recognises and celebrates its links to its traditional owners and provides cultural and learning opportunities which meet the needs of our diverse population.

GOAL ONE

Our residents are proud of their diverse community, celebrating their similarities and differences.

GOAL TWO

People living in and visiting our city have access to an inclusive and diverse range of vibrant community and cultural places and spaces.

GOAL THREE

Our community is able to learn and grow through a wealth of art, culture and lifelong learning opportunities.

Community Indicators

The following Community Indicators have been selected for this outcome area. Council will be monitoring these indicators and over the coming quarters, and baseline data will be reported.

Early Childhood Development

Early childhood development indicators are important markers of the welfare of children and can predict future social inclusion outcomes. Investing in resources to support children in their early years brings long-term benefits to them and the whole community (Karoly, Kilburn, & Cannon 2005).

Library Use

Libraries are an important educational and cultural resource. Libraries are an important service for further education and for accessing information; they also provide a venue for social participation, communities and networks. This indicator measures the frequency of access of library resources.

Post School Qualifications

Higher levels of education and training can assist people in developing knowledge and skills that can be used to improve personal living standards, as well as the resources available to a community. For an individual, educational attainment can assist in finding and developing a rewarding long-term career. For the wider community, having a knowledgeable and well-educated population is vital for supporting economic development, improving living conditions and community networks, and therefore - social inclusion. Post-school qualifications refer to those qualifications awarded for attainments other than pre-primary, primary and secondary education.

Financial Position

In Councils fixed operations this outcome has a 10.55% positive result with income on track to be within council's adopted budget.

The project budget in this outcome is currently underspent reflecting the scheduled commencement of some projects later in the year.

Overall the outcome is unspent by 11.65% year to date.

All projects are on track.

Progress Against Projects

This quarter has seen some great early work on projects for the year with all projects that were scheduled to start commencing. Our highlights this quarter include: eBooks and eAudiobooks became available for library members to download from the library's website on 16 July and demonstrations were held at each library location. A demonstration was also held in Mandarin at West Ryde Branch with 24 people attending. The new collection has been well received by people living, working or studying in the City of Ryde, with 3067 eBooks/eAudiobooks borrowed during the first quarter.

The Hon. Victor Dominello, MP and Mayor, Ivan Petch at the opening of Calligraphers at See Street.

The Children's and Youth Writers Festival, a cultural development event was held during September in celebration of the National Year of Reading 2012. The festival was held over two Saturdays and invited children and young adults to develop new skills or share their talents at a series of workshops. The workshops included creative writing, writing for comic books, poetry writing and for the older age group a playwriting workshop. Duncan Ball, author of popular children's series, Selby the Dog and Emily Eyefinger also spoke at festival. Over 150 children and young adults attended the activities, with much positive feedback and requests for the library to run more creative writing workshops in the future.

The City of Ryde in partnership with Meadowbank College (TAFE) signed an agreement to provide the See Street Gallery at cost recovery to three local art groups in 2012. In September, as part of the Third Season Exhibition Program, the City hosted the Australian Society of Calligraphers. The exhibition was opened by The Hon. Victor Dominello, MP and Mayor, Ivan Petch and gave audiences the experience of shaping how we talk and visions for our future, through words and beyond.

Sponsorship of cash and in-kind support for the Granny Smith Festival exceeded last year by \$4500, which assists in offsetting the cost to the community in holding this headline event.

CITY OF PROGRESSIVE LEADERSHIP

A well led and managed city, supported by ethical organisations which deliver projects and services to the community by listening, advocating and responding to their needs.

Our outcome of a City of Progressive Leadership will foster collaborative approaches to the governance of our city across all levels of government, to focus on delivering results against our agreed strategic outcomes in the most cost effective way. Our community will be at the heart of our decision making and service delivery and will enjoy a strong sense of connection with their council.

GOAL ONE

Our city is well led and managed.

GOAL TWO

The City of Ryde will deliver value for money services for our community and our customers.

GOAL THREE

Our residents trust their council, feel well informed, heard, valued and involved in the future of their city.

Community Indicators

The following Community Indicators have been selected for this outcome area. Council will be monitoring these indicators and over the coming quarters, and baseline data will be reported.

Council Management and Leadership

Listening and responding to the needs of the community forms one part of progressive leadership. This indicator measures the access of the community to decisions and decision-makers and their participation in civic society. Ideally, all citizens should be able to input into decision-making that affects them and ensure that their views are proportionally represented. The lack of means for citizens to convey views to decision-makers is seen as a barrier to social inclusion.

Leadership in the City of Ryde

The depth of leadership capital in an area, and how well it is led and managed may be associated with the input of the levels of occupations and skills present in Ryde. The proportion of the work-force classified as managers, administrators and professionals can provide an indication of the presence of residents in decision-making positions

Volunteering

The services and community support provided by volunteers provides one aspect of progressive leadership. The extent of community participation in volunteer work can be an important indicator of social capital. Volunteering also represents an important method of contributing to and participation in society. Volunteering has been shown in various studies to have a positive effect not only on the recipients of services, but also on the health and wellbeing of the volunteers themselves.

Financial Position

Overall, the Outcome of City of Progressive Leadership shows a net reduction in Council's position of \$0.616 million. However, due to adjustments between outcomes and the inclusion of transfers to Reserves, the actual net reduction on Council's Working Funds position in this review for Progressive Leadership is \$0.046 million.

This result is achieved by deducting \$0.4 million that has been recommended to be transferred to the Asset Replacement Reserve, due to tight fiscal control for this first quarter and Council's excellent end of year result for 2011/2012. The balance of \$0.216 million relates to adjustments to budgets which are detailed in this report, however from this amount \$0.17 million for Stores salaries should be deducted as this is a contra entry from a saving in Recycling salaries. Therefore, a net movement or adjustment of \$0.046 million is proposed in this review.

The transfer to the Asset Replacement Reserve is recommended due to Council's growing pressure to maintain its existing infrastructure at a satisfactory standard and in meeting the day to day maintenance requirements. Further, as Council is aware, there is a funding shortfall and backlog of infrastructure works, estimated at \$120 million, that is required in bringing its infrastructure up to a satisfactory condition.

Base Budget

Income- Reduction of \$0.888 million.

Expenditure - Increase of \$0.43 million.

Non-Capital Budget - Increase \$0.1 million.

Capital Budget- Increase \$0.170 million.

Project is funded through C&C savings 12/13.
6930045	Live Neighbourhood Project	NCP Exp	53,334		16,000	The inaugural 'Hungry For Art' festival held in August 2012 was funded through the Live Neighbourhood Project - a Council initiative funded from 2011 - 2015. For 2013 the Live Neighbourhood budget was allocated to the Bennelong Bicentenary Celebrations to acknowledge the important Aboriginal connections to Ryde. Given the success of the first Hungry For Art festival as a cultural initiative and its popularity in the community, and to build on the interest and established momentum of the event, funding is being allocated to deliver Hungary for Art 2013. This project is funded from Community and Culture's existing budget allocation this financial year.

Quarterly Changes Report - Detailed

			Approved Budget 12/13	YTD Actual 212/13	Proposed Changes 12/13	Comments
6930046	Ryde Youth Music Project	NCP Exp	25,899		(12,000)	Project evaluation after year one showed that the success of the project would depend on grass roots youth champions which do not exist currently. It is recommended that the Ryde Youth Theatre (RYT) be supported and used as a platform from which other grass roots projects can develop. The funding for this project is recommended to be transferred to the RYT.
6930047	Ryde Youth Theatre Group	NCP Exp	83,650		12,000	Ryde Youth Theatre has proven very successful as a youth development project
